Dear Sir/Madam,

Re: Tertiary Treatment System Serving Bluestone Resorts Limited

I write further to your discussions with Environment Officer Ross Grisbrook regarding your sewage treatment system at Bluestone, Canaston Bridge.

I acknowledge that you advised that works are currently underway to remove clean water infiltration from the foul drainage network serving the system. You anticipate that the work should be substantially complete by the end of February 2021, but remaining work could be required past this date.

You have indicated that the clean water removal work is calculated to bring the treatment system back into full compliance with the maximum daily volume limit of 562 cubic metres per day and will allow for any future growth at the resort to remain compliant.

As outlined during a video call on the 21 January 2021 with Liz Weedon (and confirmation email of 28 January) we had been considering serving an Enforcement Notice on the company to ensure compliance with the discharge permit for the above treatment system. I hereby enclose the Enforcement Notice. Please read it, noting the required steps to be met by the deadline.

This notice is issued under Regulation 36 of the Environmental Permitting (England and Wales) Regulations 2016. Failure to comply with the requirements set out in this Notice is an offence.

Yours sincerely,

Robert Phillips
Pembrokeshire Environment Team Leader
