Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

### 4. Details of our assessment

Storm Tank full during visit but rain had ceased hours before. Sewer catchment appears to retain high flows for a lengthy period of time after the cessation of rainfall. Catchment investigations are recommended to remove clean water from the sewer.

Phosphate removal infrastructure installed at the site and undergoing commissioning,

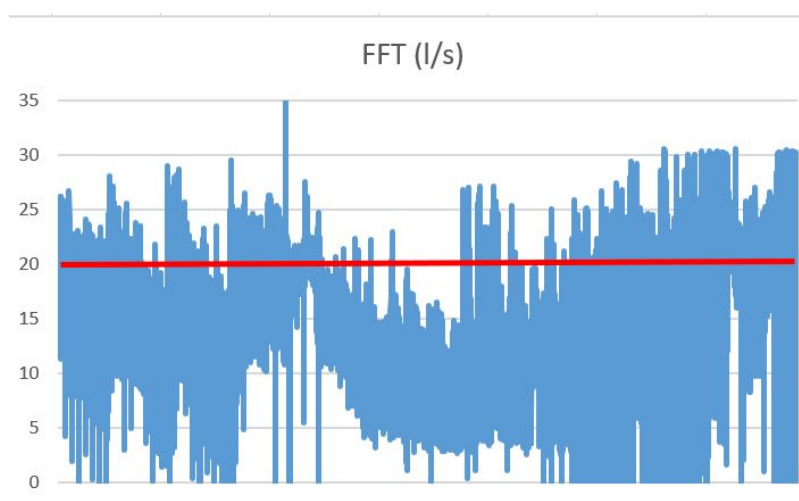

A new wet well / chamber was allowing effluent to splash outside of the chamber and onto the grass:

A panel screen or alteration is required to prevent this.

Flow data received on 23/12/20.

The graphed FFT data shows that the STW treats at least the 20.8 l/s prior to flow going to Storm.
