Section 1 – Compliance Assessment Summary

A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Llantrisant Site Visit – Llantrisant HWRC, Rhondda Cynon Taff (EPR/ WB3793HF) – 05/07/2018

Environment officer Craig Coleman attended Amgen's facility at Llantrisant, RCT on 05/07/2018 to meet with Ian McAlister and Lee Foulkes to undertake a routine site inspection. The Llantrisant site houses a community recycling sale which allows suitable waste to be resold in place of being sent to land fill.

(B3) Site drainage engineering (clean & foul)

Whilst onsite the drainage was assessed; the site benefits from an impermeable, concreted surface to prevent any spillage from entering ground water. The drainage was funnelled in to an interceptor which is maintained on a biannual basis.

(C4) Storage, handling, labelling and Segregation

The waste stored on site was done so in appropriate containers and all waste types were separated and had good signage to aid members of the public as to which container their waste should be disposed of. All liquid waste on site was segregated and held in bunded containers.

(D1) Site security

The site benefits from being housed next to Prichard's which has overlapping security cameras.

(D2) Accidents, emergency and incident planning

There are spill kits available at the facility in the event of any oil spillages.

(F3) Dust/fibres/particulates and litter

The overall condition of the site was very clean, there was no litter or debris from site activity.
