Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This NRW led variation makes the following changes;

The units for the dioxin emission limit value for emission point A8 was changed in error from ng to mg, this has now been changed back to the correct units.

Permit condition 2.3.6 has been amended to refer to table S2.3 as this table includes permitted waste types.

Permit condition 2.3.11 now refers to Permit condition 2.3.10 and not 2.3.7.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Schedule 2 – conditions to be amended

The following conditions are amended as a result of an NRW initiated variation;

The units of measurement associated with the Dioxin ELV for authorised emission point A8 has been changed from mg/Nm³ to ng/Nm³ in-line with Annex 6 IED and BATC.

Permit condition 2.3.6 has been amended to add Table S2.3, as this table includes permitted waste types.

Permit condition 2.3.11 has been amended to reference Permit condition 2.3.10 instead of Permit condition 2.3.7. This brings the permit in line with the EA waste code of practice permit template to require testing of waste to demonstrate compliance with the specification in table S2.1 rather than condition 2.3.7 which lists excluded substances.
