Dyddiad / Date: 06/05/2021

Dear Darran,

**Environmental permit:** EPR-BV8016ID

**Regulated facility:** Kelloggs, Bryn Lane, Wrexham Industrial Estate, LL13 9UT

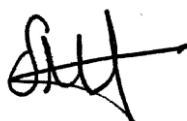

**RE: Reuse of Emission Point 39**

Thank you for notification that you will be bringing the previously decommissioned emission point 39 from the RDX flaking mill exhaust via cyclone abatement back into use for dust collection from the Bran Flakes flaking plant and All Bran shredder area.

Emission point 39 was assessed during the original permit application and was not deemed to be significant, therefore is not listed in Table 2.2.1 of the permit. As the plant will be recommissioned and managed in accordance with the original operating techniques this change can be agreed under Condition 1.5.1 and 2.1.1 of the installation permit BV8016ID, and will be incorporated as part of the upcoming Food, Drink and Milk Bref permit review, along with the revised Emission Points plan reference W-bl-303r16.

Please provide notification when the unit is recommissioned and confirm that the noise monitoring and management plan have been updated to include point 39.

Yours sincerely,

Siân McGregor-Andrew

Senior Industry and Waste Regulation Officer, Industry Regulation Team North East.
