Date 14.5.18

Dear Sohan

Writing as promised with report on above ground diesel tank as required.

1. The storage tank unit holds a capacity of 45000 litres SWC of product.
2. It is double skinned, fully bunded unit.
3. Manufactured date 2004
4. Unit fully cleaned 2018 and re-suited to new position. Fully inspected base as lifted with on site crane and checked over.
5. Wet test delivery showed no leaks and new isolation valves and pipe works fitted.
6. Delivery suction lines are in single skin plastic dura pipe works as recommended by APEA guidelines for rules and regulation of construction of a petrol forecourt.
7. The tank is monitored by a pneumatic gauge (Normond instrument)
8. Wet stock is evaluated through a key fob control system linked to pump and office PC unit for tanker delivery input and fleet distributions.

Yours sincerely

John Marsland
