Tuberculin Test Certificate

Test Performer: Brendan Griffin

Practice Name: Fenton Veterinary Practice*

Appendix 1 provides the test results for the animals subjected to the TB skin test (TB skin test - SI) on 30/05/2016.

Our records show that, as of the date of this letter, your herd last came off restrictions on 14/06/2016.

This certificate is eligible to be used as proof of pre-movement testing of the clear tested animals listed, for 60 days following the injection of the tuberculin. Please note: The specific skin measurements for each animal listed may not be detailed, instead refer to the Overall Result.

You are advised to retain all Test Certificates for 3 years and 60 days as evidence of pre-movement testing.

Please make additional copies of this certificate should you be required to provide proof of testing when selling cattle.

Issued by:

Jennifer Griffiths

For the Regional Veterinary Lead / Scotland Veterinary Lead / Veterinary Lead Wales

The Animal and Plant Health Agency is an Executive Agency of the Department for Environment, Food and Rural Affairs working to safeguard animal and plant health for the benefit of people, the environment and the economy
