Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

The installation carries out a variety of waste disposal and recovery processes, and can accept a wide variety of hazardous and non-hazardous wastes which arrive in containers or in bulk road tankers. Pre-acceptance checks and analysis carried out on the wastes determine the storage, treatment, recovery or disposal activity within the installation. Containerised wastes are stored and segregated, according to their types and properties, within a designated transfer facility building. They are either transferred off-site for recovery or disposal at another suitably permitted facility or introduced into the treatment plant at the installation.

The transfer facility is also equipped with drum washing and crushing facilities to enable the re-use and recycling of metal and plastic drums or containers.

The treatment plant is situated within the main process building and is capable of carrying out a number of treatment processes, including neutralisation of aqueous acidic and alkaline wastes and the precipitation of insoluble metal hydroxides using calcium hydroxide. Cyanide wastes are oxidised with sodium hypochlorite, in designated reaction tanks within the main process building, to produce cyanate ions which react further to produce carbon dioxide and nitrogen. The resulting liquid waste is then transferred to the main treatment system for the precipitation and removal of metals prior to discharge to sewer. Water is recovered and reused as part of the process.

Waste oils and oil/water mixtures are separated by settlement and decanting techniques within the main process building. The recovered oil is despatched for further treatment and/or use as an alternative fuel at another suitably permitted facility. The separated water is processed through the treatment plant prior to discharge to sewer.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
