

# **Notice of variation and consolidation with introductory note**

The Environmental Permitting (England & Wales) Regulations 2016

---

**Tradebe Gwent Limited**

**Gwent Waste Management Centre  
Corporation Road  
Newport  
NP19 4RD**

Variation number

**EPR/SP3531SK/V009**

Permit number

**EPR/SP3531SK**

# **Gwent Waste Management Centre**

## **Permit number EPR/SP3531SK**

### **Introductory note**

#### **This introductory note does not form a part of the permit**

The main features of the permit are as follows.

The installation carries out a variety of waste disposal and recovery processes, and can accept a wide variety of hazardous and non-hazardous wastes which arrive in containers or in bulk road tankers. Pre-acceptance checks and analysis carried out on the wastes determine the storage, treatment, recovery or disposal activity within the installation. Containerised wastes are stored and segregated, according to their types and properties, within a designated transfer facility building. They are either transferred off-site for recovery or disposal at another suitably permitted facility or introduced into the treatment plant at the installation.

The transfer facility is also equipped with drum washing and crushing facilities to enable the re-use and recycling of metal and plastic drums or containers.

The treatment plant is situated within the main process building and is capable of carrying out a number of treatment processes, including neutralisation of aqueous acidic and alkaline wastes and the precipitation of insoluble metal hydroxides using calcium hydroxide. Cyanide wastes are oxidised with sodium hypochlorite, in designated reaction tanks within the main process building, to produce cyanate ions which react further to produce carbon dioxide and nitrogen. The resulting liquid waste is then transferred to the main treatment system for the precipitation and removal of metals prior to discharge to sewer. Water is recovered and reused as part of the process.

Waste oils and oil/water mixtures are separated by settlement and decanting techniques within the main process building. The recovered oil is despatched for further treatment and/or use as an alternative fuel at another suitably permitted facility. The separated water is processed through the treatment plant prior to discharge to sewer.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

<b>Description</b>	<b>Date</b>	<b>Comments</b>
Application SP3531SK	24/08/05	
Additional information received	24/03/06	12/05/06 and 15/05/06
Permit determined	26/06/06	
Application for variation EA/EPR/SP3531SK/V002	Duly made 27/06/08	
Variation EA/EPR/SP3531SK/V002 issued	13/10/08	
Application for variation EA/EPR/SP3531SK/V003	Duly made 06/04/10	
Variation EA/EPR/SP3531SK/V003 issued	29/07/10	
Application EPR/SP3531SK/V004	02/11/11	Application to vary and add some additional waste codes
Variation determined EPR/SP3531SK	13/01/12	Varied permit issued
Natural Resources Wales variation determined EPR/SP3531SK/V005	10/04/13	Natural Resources Wales variation to implement the changes introduced by IED
Variation application EPR/SP3531SK/V006	Duly made 13/05/13	Application to add waste recovery codes to the permit
Additional information requested	28/06/13	
Additional information received	08/07/13	Clarification on where R codes and applicable waste types fit into Table S1.1
Variation determined EPR/SP3531SK/V006	20/08/13	Varied permit issued
Variation application EPR/SP3531SK/V007	18/02/15	Application to change registered office address
Variation determined EPR/SP3531SK/V007	27/04/15	Varied permit issued
Variation application EPR/SP3531SK/V008	Duly made 03/07/19	Application to add additional waste codes and to amend the site plan
Variation determined EPR/SP3531SK/V008	19/08/19	Varied permit issued

Regulation 61 Notice sent to the Operator	05/04/19	Issue of a Notice under Regulation 61(1) of the EPR. Natural Resources Wales initiated review and variation to vary the permit following the publication of the revised Best Available Techniques (BAT) Reference Document (BRef) for Waste Treatment.
Regulation 61 Notice response	30/09/19	Response received from the operator.
Additional information received	29/07/19	Additional information received such as details of the sites Environmental Management System.
Natural Resources Wales initiated variation determined EPR/SP3531SK/V009	28/06/21	Updated and consolidated permit issued to Tradebe Gwent Limited.

End of introductory note

## Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Natural Resources Body for Wales (“Natural Resources Wales”) in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies and consolidates

**Permit number**

EPR/SP3531SK

issued to

**Tradebe Gwent Limited** (“the operator”)

whose registered office is

**Atlas House  
Third Avenue  
Globe Park  
Marlow  
Buckinghamshire  
SL7 1EY**

company registration number 00171493

to operate an installation at

**Gwent Waste Management Centre  
Corporation Road  
Newport  
NP19 4RD**

to the extent set out in the schedules.

The notice shall take effect from 28/06/2021

Signed

Date

<b>Holly Noble</b>	<b>28/06/2021</b>
--------------------	-------------------

Authorised on behalf of Natural Resources Wales

**Schedule 1**

All conditions have been varied by the consolidated permit as a result of a Natural Resources Wales initiated variation.

**Schedule 2 – consolidated permit**

Consolidated permit issued as a separate document.
