Dear Sir / Madam,

This is an application for a borehole permit for an existing septic tank which serves half of our house.

The borehole permit is necessary because the septic tank is within 50m of the borehole (it's about 35m away). What

the enclosed map does not show is the borehole is quite a bit above the septic tank (2m - 3m). Have completed

form the best I can but will need a copy of a suitable 'management system'

Thanks. ASH. A. STRONG.
