

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

FCC Recycling (UK) Limited

**Phase 2 – Wrexham Recycling Park
Bryn Lane
Wrexham Industrial Estate
Wrexham
LL13 9UT**

Variation number

EPR/BB3436RA/V003

Permit number

EPR/BB3436RA

Phase 2 – Wrexham Recycling Park

Permit number EPR/BB3436RA

Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is a permit variation following the publication of the revised Best Available Techniques (BAT) Reference Document (BRef) Waste Treatment. The associated BAT conclusions to this document were published on the 17th August 2018 in the Official Journal of the European Union.

This variation incorporates the changes required by the Industrial Emissions Directive following a statutory review of permits in the Waste Treatment sector. These include the amendment of the wording of several permit conditions relating to notifications, changes to emission limits and monitoring requirements. The interpretation section of the permit has also been updated and the opportunity has been taken to consolidate the original permit and subsequent variations.

We are satisfied that the operator will be compliant with the published BAT conclusions which will apply from 17th August 2022.

The rest of the installation is unchanged and continues to be operated as follows:

This permit allows the operator to operate a non-hazardous Mechanical Biological (aerobic) Treatment (MBT) facility with an annual throughput of 64,000 tonnes. Permitted wastes include mixed municipal wastes that are subjected to biological treatment consisting of aerobic composting or bio-drying, heat treatment, physical treatment including screening, crushing, baling or shredding, and pelletising for the purpose of recovery.

A road sweeping processing facility is also permitted to accept solid road sweeping waste only, which is passed through wet screening equipment removing the grit and aggregate fractions. These fractions will then be reused as building materials. The remaining organic and solids will be recycled off site or disposed. Dirty water from the process will be discharged to sewer or removed from site by tanker to be disposed of at a suitable facility. The annual throughput will be 6,000 tonnes.

The schedules specify the changes made to the permit. Schedule 1 of the notice specifies the conditions that have been varied and Schedule 2 comprises a consolidated permit which reflects the changes being made.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit

Description	Date	Comments
Regulation 61 Notice sent to the operator	05/04/2019	Issue of a Notice under Regulation 61(1) of the EPR. Natural Resources Wales initiated review and variation to vary the permit following the publication of the revised Best Available Techniques (BAT) Reference Document (BRef) for Waste Treatment.
