Maximum quantities at Peak times

Trade name / Substance	Solid, liquid, gas or powder	UN number (if known)	Maximum quantity	Location marked on site plan	Type of containment & size	Health & environmental properties

5. POLLUTION PREVENTION EQUIPMENT INVENTORY

Type	Location	Amount	Staff contact
Spill kit	Fuel pumps	Variable amount but no greater than 110 litres	Main office
Spill kit	Maintainence shed	Variable amount but no greater than 110 litres	Main office

6. INCIDENT RESPONSE PROCEDURES

Instructions for Dealing with a Fuel Spill

1. If the fuel spill is large, evacuate the buildings by triggering the fire alarm. Contact the emergency services by dialling 999, and retreat to a safe distance. **DO NOT PUT YOURSELF AT RISK.** When safe to do so, contact the Helpdesk on 0845 607 6060 who will inform the relevant operations manager or duty manager (if out of office hours).
2. Do **NOT** attempt to hose down the spill or disperse it with detergent.
3. If the fuel spill is small – less than 90 litres (20 gallons) – locate the fuel spill kit. This is kept close to the fuel tank in a container marked “**OIL SPILL RESPONSE KIT**”.
4. Open the kit and put on the protective gloves. Use the pillows/granules to mop up the spill, always following the manufacturers’ instructions.
5. Place the used pillows/granules in the polythene bags provided and put the bags in a safe place.
6. Contact the Depot Manager who will arrange for a specialist waste contractor to dispose of them.
7. Contact the Building Co-ordinator who will inform the relevant operations manager or duty manager (if out of office hours) of the incident.
8. If they are unavailable contact the Helpdesk on 0845 607 6060, who will inform the relevant operations manager or duty manager (if out of office hours) of the incident.

FIRE
