Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

The changes applied to the permit are;

1. Replacement of two existing biomass boilers
This variation replaces both biomass boilers on site (combined thermal rated input 488kW). Replacing them with two more biomass boilers by a different manufacturer, the boilers will each have a thermal rated input of 227kW (454kW total thermal input).
2. Addition of diesel-powered back-up water boiler
A 478kW water boiler is to be installed to support the biomass boilers in the event of malfunction or breakdown.
3. Removal of the CHP unit from the permit
Following damage due to a fire in Oct 2019 the CHP unit has been removed from site. Table S1.1 and S3.2 has been updated.
4. Update to the site layout plan
Following the changes mentioned above the site layout plan has been updated and included in Schedule 7 of the consolidated permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
