Schedule

1. Environmental Management System (EMS)

The part of EMS you have provided is not sufficient. Because you have stated that you will not manage the activities at the site in the same way as the current operator (question 2b Part D2), we need more details in your EMS summary.

The summary of EMS means the overview of each section within the document. You need to provide enough information for us to be able to assess that the operator is competent in identifying and reducing the risks of pollution at the site.

Action: Please provide the summary of EMS that includes overview of each section.

2. Wamitab

The technical qualification you have provided is adequate to the operations that will be taking place at the site. However, you have provided the original certificate dated 2005 and the continuing competency certificate obtained in 2018.

There is a 10 years gap between these two certificates. To confirm that the technically competent person kept continuity of knowledge and skills since obtaining the original certificate, we need you to provide all the certificates that were obtained between 2007 and 2018.

Action: Please provide all the missing certificates.
