### Introductory note

#### **This introductory note does not form a part of the permit**

The main features of the permit are as follows

The site covering an area of approximately 7 hectares, is situated on Amex Park, a small industrial estate in Johnstown (Grid Reference SN 40150 19300). It is approximately 4 kilometres from Carmarthen town centre. The site is based on the site of a previous dairy and its infrastructure and waste water treatment works have been adapted and modified by the permit holder to treat industrial waste effluents.

The site carries out a variety of waste disposal and recovery processes. A summary of these is as follows:

Most of the effluents are delivered to the site by road tanker. Effluents are filtered to remove solids during discharge and then undergo blending with high and low strength effluents in the high strength biodegradable effluent area before they are transferred for treatment into the main biological treatment plant where they undergo aerobic biological treatment. Removed solids are sent for disposal to landfill and the treated effluent is discharged into the River Tywi.

The recovery and disposal of waste oils and oil/water mixtures is carried out in the free oil separation area. The wastes are delivered to the site by road tanker, or in containers. Free oil/water mixtures are discharged to the free oil separation tanks where the oil is separated by gravity and heat which is provided by the on-site boiler. The separated water is filtered to remove solids before being transferred for further treatment in the main biological treatment plant.

The recovered waste oil is sent off-site for further processing or use as an alternative fuel. The oil contaminated solids are transferred for further treatment in the biodegradation facility on-site. The recovery and disposal of soluble waste oils is carried out in the soluble oil facility where the wastes are delivered to the site by road tanker or in containers. On arrival they are discharged into a storage tank where they undergo treatment in the working tank via an ultrafiltration unit. The concentrated oil mixture is pH adjusted to aid further separation. The recovered oil is then sent off site for further processing or for use as an alternative fuel. The separated water is transferred to the main biological treatment plant for further treatment.

The disposal of hazardous drummed and containerised waste is carried out in the transfer facility. These wastes are stored in segregated bays according to their waste type and property, pending onward disposal off-site or disposal or recovery on-site via the waste oil recovery plants, biological treatment plant or biodegradation facility.

The biological treatment of hazardous sludges is carried out in the biodegradation area where waste absorbents and packaging are delivered to the site in containers or skips. The biodegradation facility also accepts oil-contaminated solids from the site's own oil recovery operations. The degradation of wastes involves inoculation with activated sludge from the main biological treatment plant or the use of specific bacterial inoculations. The process also involves mixing, watering and aeration to remove hazardous substances. The degraded wastes are then disposed of off-site to landfill.

A waste activity of asbestos waste transfer station is also carried out at the site.

The site is within the Agency's 1 in 75 years (or 1.3% in a year) or greater floodplain which indicates a significant chance of flooding, particularly for the lower, eastern, sections of the site where the main biological treatment plant is situated.

The River Tywi, which flows north to south beyond the marsh at the eastern end of the site, is a Special Conservation Area (SAC) and is within 1 kilometre of the site. There are also two Sites of Special Scientific Interest (SSSI) within 2 kilometres, east and north east of the site.

The site is situated on a minor aquifer, with soils of high leaching potential, and the underlying geology is that of fluvial glacial sands and gravels underlain by clay units. Within a kilometre south and south west of the site there is housing, a school and a leisure centre.

The whole of the sites surface is sealed with an impermeable pavement with surface water run-off and roof water directed into the on-site treatment systems prior to discharge to the River Tywi.

The only air emissions (excluding fugitive emissions) arise from the boiler stack. Emissions to controlled waters consist of discharges of treated effluents from on-site treatment systems directly into the River Tywi. There are no other process emissions, either to sewer or to land, from the site.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

# Conditions

## 1 Management

### 1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
  - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.
- 1.1.4 The operator shall comply with the requirements of an approved competence scheme.

### 1.2 Energy efficiency

- 1.2.1 For the following activities referenced in schedule 1, table S1.1 (A1 to A4) the operator shall:
- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
  - (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
  - (c) take any further appropriate measures identified by a review.

### 1.3 Efficient use of raw materials

- 1.3.1 For the following activities referenced in schedule 1, table S1.1 (A1 to A4) the operator shall:
- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
  - (b) maintain records of raw materials and water used in the activities;
  - (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
  - (d) take any further appropriate measures identified by a review.

### 1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
  - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and

- (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

## **2 Operations**

### **2.1 Permitted activities**

2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the "activities").

2.1.2 For the following activities referenced in schedule 1, table S1.1 (A1 to A4) waste authorised by this permit shall be clearly distinguished from any other waste on the site.

### **2.2 The site**

2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

### **2.3 Operating techniques**

- 2.3.1
- (a) The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by Natural Resources Wales.
  - (b) If notified by Natural Resources Wales that the activities are giving rise to pollution, the operator shall submit to Natural Resources Wales for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

2.3.2 Waste shall only be accepted if:

- (a) it is of a type and quantity listed in schedule 2 table(s) S2.1, S2.2, S2.3, S2.4, S2.5, and S2.6; and
- (b) it conforms to the description in the documentation supplied by the producer and holder.

2.3.3 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:

- (a) the nature of the process producing the waste;
- (b) the composition of the waste;
- (c) the handling requirements of the waste;
- (d) the hazardous property associated with the waste, if applicable; and
- (e) the waste code of the waste.

2.3.4 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

## **2.4 Improvement programme**

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by Natural Resources Wales.
- 2.4.2 Except in the case of an improvement which consists only of a submission to Natural Resources Wales, the operator shall notify Natural Resources Wales within 14 days of completion of each improvement.

## **2.5 Technical requirements**

### **WEEE storage**

- 2.5.1 The storage (including temporary storage) and treatment of WEEE shall be carried out in accordance with the technical requirements of Annex III of the WEEE Directive.

### **Hazardous waste storage and treatment**

- 2.5.2 Hazardous waste shall not be mixed, either with a different category of hazardous waste or with other waste, substances or materials, unless it is authorised by schedule 1 table S1.1 and appropriate measures are taken.

## **3 Emissions and monitoring**

### **3.1 Emissions to water, air or land**

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1 and S3.2.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Total annual emissions from the emission point(s) set out in tables schedule 3 S3.2 of a substance listed in schedule 3 table S3.3 shall not exceed the relevant limit in table S3.3.
- 3.1.4 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

### **3.2 Emissions of substances not controlled by emission limits**

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution, submit to Natural Resources Wales for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
  - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

### **3.3 Odour**

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

- 3.3.2 The operator shall:

- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to odour, submit to Natural Resources Wales for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;
- (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

### **3.4 Noise and vibration**

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

- 3.4.2 The operator shall:

- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to noise and vibration, submit to Natural Resources Wales for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
- (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

### **3.5 Monitoring**

- 3.5.1 The operator shall, unless otherwise agreed in writing by Natural Resources Wales, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1, and S3.2;
- (b) surface water or groundwater specified in table S3.4;

- 3.5.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.

- 3.5.3 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme and the environmental or other monitoring specified in condition 3.5.1 shall have either MCERTS certification or MCERTS accreditation (as appropriate), where available, unless otherwise agreed in writing by Natural Resources Wales.

- 3.5.4 Permanent means of access shall be provided to enable sampling/monitoring to be carried out in relation to the emission points specified in schedule 3 tables S3.1, S3.2 and S3.4 unless otherwise agreed in writing by Natural Resources Wales.

## **3.6 Pests**

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

- 3.6.2 The operator shall:

- (a) if notified by Natural Resources Wales, submit to Natural Resources Wales for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by Natural resources Wales.

## **3.7 Fire**

- 3.7.1 The operator shall manage and operate the activities in accordance with a written fire prevention plan using the current, relevant fire prevention plan guidance.

- 3.7.2 The operator shall:

- (a) if notified by Natural Resources Wales that the activities could cause a fire risk, submit to Natural Resources Wales a fire prevention plan which identifies and minimises the risks of fire;
- (b) Operate the activity in accordance with the fire prevention plan, from the date of submission, unless otherwise agreed in writing by Natural Resources Wales.

# **4 Information**

## **4.1 Records**

- 4.1.1 All records required to be made by this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
- (d) be retained, unless otherwise agreed in writing by Natural Resources Wales, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
  - (i) off-site environmental effects; and
  - (ii) matters which affect the condition of the land and groundwater.

- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by Natural Resources Wales.

## 4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to Natural Resources Wales using the contact details supplied in writing by Natural Resources Wales.
- 4.2.2 For the following activities referenced in schedule 1, table S1.1 (A1 to A4) a report or reports on the performance of the activities over the previous year shall be submitted to Natural Resources Wales by 31 January (or other date agreed in writing by Natural Resources Wales) each year. The report(s) shall include as a minimum:
- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
  - (b) the annual production /treatment data set out in schedule 4 table S4.2; and
  - (c) the performance parameters set out in schedule 4 table S4.3 using the forms specified in table S4.4 of that schedule.
- 4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by Natural Resources Wales, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:
- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;
  - (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.4 ; and
  - (c) giving the information from such results and assessments as may be required by the forms specified in those tables.
- 4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to Natural Resources Wales, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.
- 4.2.5 Within 1 month of the end of each quarter, the operator shall submit to Natural Resources Wales using the form made available for the purpose, the information specified on the form relating to the site and the waste accepted and removed from it during the previous quarter.

## 4.3 Notifications

- 4.3.1 For the following activities referenced in schedule 1, table S1.1 (A1 to A4)
- (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
    - (i) inform Natural Resources Wales,
    - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
    - (iii) take the measures necessary to prevent further possible incidents or accidents;
  - (b) in the event of a breach of any permit condition the operator must immediately—
    - (i) inform Natural Resources Wales, and
    - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
  - (c) in the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the

environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

- 4.3.2 Any information provided under condition 4.3.1 (a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.3 For the following activities referenced in schedule 1, table S1.1 (A8) Natural Resources Wales shall be notified without delay following the detection of:
- (a) any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution;
  - (b) the breach of a limit specified in the permit; or
  - (c) any significant adverse environmental effects.
- 4.3.4 Any information provided under condition 4.3.3 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.5 Where Natural Resources Wales has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform Natural Resources Wales when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to Natural Resources Wales at least 14 days before the date the monitoring is to be undertaken.
- 4.3.6 Natural Resources Wales shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:
- Where the operator is a registered company:
- (a) any change in the operator's trading name, registered name or registered office address; and
  - (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.
- Where the operator is a corporate body other than a registered company:
- (a) any change in the operator's name or address; and
  - (b) any steps taken with a view to the dissolution of the operator.
- In any other case:
- (a) the death of any of the named operators (where the operator consists of more than one named individual);
  - (b) any change in the operator's name(s) or address(es); and
  - (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.
- 4.3.7 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
- (a) Natural Resources Wales shall be notified at least 14 days before making the change; and
  - (b) the notification shall contain a description of the proposed change in operation.

4.3.8 Natural Resources Wales shall be given at least 14 days notice before implementation of any part of the site closure plan.

## **4.4 Interpretation**

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

**Table S1.3 Improvement programme requirements**

Reference	Requirement	Date
	Improvement Conditions IC1 to IC17 of the original permit have been submitted and reports and plans submitted to and approved by the Regulator are now incorporated as site operating techniques via inclusion in Table S1.2.	
IC18 (V003)	<p>The Operator shall submit an Environmental Monitoring Programme which must contain documented objectives, design details and procedures to be adopted for site monitoring. The environmental monitoring programme shall incorporate specifications to include the following issues:</p> <ol style="list-style-type: none"> <li>1. management structure and technical competence;</li> <li>2. monitoring objectives;</li> <li>3. the number and location of monitoring points;</li> <li>4. monitoring measurements;</li> <li>5. monitoring schedules;</li> <li>6. assessment and compliance criteria, and contingency actions;</li> <li>7. design of monitoring points;</li> <li>8. monitoring methodology;</li> <li>9. data management and reporting procedures;</li> <li>10. Quality Assurance including Quality Control measures for items 7, 8 and 9 above;</li> <li>11. Requirement to trend and interpret data to determine Environmental Impact.</li> </ol> <p>Control levels limits and Maximum Emission Limits shall be set within the plan, which as a minimum shall include the following metals and Cyanide:</p> <ol style="list-style-type: none"> <li>(a) Zinc and its compounds as Zn;</li> <li>(b) Mercury and its compounds as Hg;</li> <li>(c) Cadmium and its compounds as Cd;</li> <li>(d) Lead and its compounds as Pb;</li> <li>(e) Nickel and its compounds as Ni;</li> <li>(f) Copper and its compounds as Cu;</li> </ol> <p>The maximum emission limit for the first twelve months following receipt of the Environmental Monitoring Programme shall be based on the original permitted emission limit, or where exceeded, the maximum recorded value for monitoring data between 2007 – 2009 minus 10% (or less) unless agreed with the Regulator.</p> <p>The following substances shall also be included with the monitoring programme. Monthly, composite samples shall be taken for:</p> <ol style="list-style-type: none"> <li>(a) Phosphate</li> <li>(b) Cyanide</li> <li>(c) Phenol</li> </ol> <p>The operator shall ensure the Environmental Monitoring Programme includes a requirement to review and reduce the emission limits on an annual basis. The review must take into account relevant Environmental Quality Standards and site monitoring data. A full justification for each limit must be provided annually.</p> <p>The operator must have due regard to the requirements of 'Technical Guidance Note (Monitoring) M18 – Monitoring of Discharges to Water and Sewer' when preparing the programme. The report shall ensure that a review of the document is undertaken on an annual basis.</p>	<p><b>DUE:</b> 30/06/10</p> <p><b>COMPLETED:</b> 20/12/2017</p>

**Table S1.3 Improvement programme requirements**

<b>Reference</b>	<b>Requirement</b>	<b>Date</b>
IC19 (V003)	The operator shall develop a documented dangerous substance and heavy metal identification and reduction program for implementation at the site. The programme shall identify measures to pre-treat wastes and / or enhance effluent treatment in order to minimise levels of dangerous substances and heavy metals prior to discharge via the authorised release point. A review of all available technologies to reduce dangerous substance and metal levels within the discharge shall form part of the reduction programme. Levels of dangerous substance and heavy metals within the influent to the plant shall also be assessed as part of the programme .The programme shall be reviewed on an annual basis.	<b>DUE:</b> 31/08/10  <b>COMPLETED:</b> 17/01/2018
IC20 (V003)	(a) The operator shall undertake an assessment of the impact on the water environment from the effluent treatment plant using all available data. The operator shall use the methodology prescribed in the Agency's guidance 'Environmental Assessment and Appraisal of BAT' (Ref. IPPC H1) in making this assessment.  (b) Where the operator identifies substances present in the effluent that are considered significant, further detailed dilution modelling should be undertaken in order to obtain a more accurate estimate of process contributions than those obtained through using simplified calculation methods . A full written justification must be provided for the choice of modelling software used (other than H1) and the input parameters used in the model shall also be provided in full within the report.  (c) The results of the modelling must be considered as part of the of the emission limit review required by the Environmental Monitoring Programme within IC18. The operator shall implement any improvements or measures as agreed in writing with the Regulator.	Superseded (See IC 35)
IC21 (V003)	The operator shall submit outline plans to improve the site infrastructure used for the waste transfer operations [transfer station] at the site. The improvements shall ensure that the full requirements of SGN S5.06 are complied with. A time table for completion of the proposed improvements shall also be provided within the submission.	<b>DUE:</b> 31/08/10  <b>COMPLETED:</b> 23/08/2017
IC22 (V003)	The operator shall submit outline plans to improve the site infrastructure used for the oil treatment operations at the site. The documented improvement plan shall ensure that the full requirements of SGN S5.06 are complied with. A time table for completion of the proposed improvements shall also be provided as part of the plan.	<b>DUE:</b> 30/09/10  <b>COMPLETED:</b> 23/08/2017
IC23	The operator shall submit a written Fire prevention and mitigation plan to Natural Resources Wales.  The Fire prevention and mitigation plan must be produced in line with the standards set out in Fire prevention and mitigation plan guidance – Waste.	3 months after permit issue or otherwise agreed in writing with Natural Resources Wales
IC24	BAT 1. Implement and adhere to an environmental management system (EMS)  The operator shall submit to Natural Resources Wales information in order to evidence compliance with BAT 1 that incorporates all of the following features in accordance with requirements specified within BAT Conclusion of the Waste Treatment BREF Document (EU 2018):  XII. residues management plan (see description in Section 6.5);	17 February 2022 or otherwise agreed in writing with Natural Resources Wales

IC29	<p>BAT 20 Reduce emissions to water</p> <p>The operator shall submit to Natural Resources Wales a written procedure(s) in accordance with requirements specified within BAT Conclusions of the Waste Treatment BREF Document (EU 2018) in relation to:</p> <p>BAT 20 - In order to reduce emissions to water, BAT is to treat waste water using an appropriate combination of the techniques described within BAT 20 Table. BAT 20 applies to all sites that treat waste waters on site to reduce emissions prior to discharge.</p> <p>a, Operator is to provide information on how the Physico-chemical treatments listed within BAT 20 table are carried out.</p> <p>b. BAT-associated emission levels (BAT-AELs) for direct discharges to a receiving water body should comply with Table 6.1 of BAT 20.</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales
IC30	<p>BAT 23 Use energy efficiently.</p> <p>The operator shall submit to Natural Resources Wales information in order to evidence compliance with BAT 23 requiring the use both of the following techniques in accordance with requirements specified within BAT Conclusion of the Waste Treatment BREF Document (EU 2018):</p> <p>a. Energy efficiency plan b. Energy balance record</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales
IC31	<p>BAT 24 Reuse of Packaging</p> <p>The operator shall submit to Natural Resources Wales a Residues Management Plan in order to evidence compliance with BAT 24 (see also BAT 1 XII) in accordance with requirements specified within BAT Conclusion of the Waste Treatment BREF Document (EU 2018).</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales
IC32	<p>BAT 33 biological treatment odour emissions</p> <p>The operator shall submit to Natural Resources Wales for approval information to evidence compliance with the following BAT requirements in accordance with requirements specified within BAT Conclusions of the Waste Treatment BREF Document (EU 2018):</p> <p>BAT 33 In order to reduce odour emissions and to improve the overall environmental performance, by selecting the waste input (to ensure its suitability for biological treatment).</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales
IC33	<p>BAT 35 biological treatment generation of waste water and reduction of water usage</p> <p>The operator shall submit to Natural Resources Wales for approval information to evidence compliance with the following BAT requirements in accordance with requirements specified within BAT Conclusions of the Waste Treatment BREF Document (EU 2018):</p> <p>BAT 35 In order to reduce the generation of waste water and to reduce water usage, BAT is to use all of the techniques described within BAT 35 Table.</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales

IC34	<p>BAT 52 Improve overall environmental performance by monitoring the waste input as part of the waste pre-acceptance and acceptance procedures.</p> <p>The operator shall submit to Natural Resources Wales information in order to evidence compliance with BAT 52 (see also BAT 2) by monitoring the waste input of:</p> <ul style="list-style-type: none"> <li>• Bioeliminability e.g. BOD, BOD-COD ratio, Zahn-Wellens test, biological inhibition potential</li> <li>• Feasibility of emulsion breaking e.g. lab testing</li> </ul> <p>in accordance with requirements specified within BAT Conclusion of the Waste Treatment BREF Document (EU 2018).</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales
IC35	<p>The operator shall submit for approval information for priority hazardous substances and any other relevant substances for all discharges to surface waters. The emissions monitoring for these substances should be carried out using the methods and standards described in the M18 guidance on "Monitoring of discharges to water and sewer".</p> <p>With reference to the risk assessment guidance on the gov.uk website entitled "Surface water pollution risk assessment for your environmental permit the Operator is to carry out the following assessments:</p> <ul style="list-style-type: none"> <li>– Screening tests for priority hazardous pollutants and any other relevant priority hazardous substances.</li> <li>– For any substance which is not screened out by the screening tests you will need to carry out modelling, as described in the risk assessment guidance "Surface water pollution risk assessment for your environmental permit".</li> </ul> <p>You must provide us with the results from the emissions monitoring, the results from the screening tests and the results from any modelling.</p>	17 February 2022 or otherwise agreed in writing with Natural Resources Wales

## Schedule 2 - Waste types, raw materials and fuels

**Table S2.1 Permitted waste types and quantities for Transfer Station**

<b>Maximum quantity</b>	The maximum quantity of waste to be accepted on site shall not exceed 250,000 tonnes per annum. Waste tonnages specific to each activity are given in Table S1.1
<b>Exclusions</b>	The following waste types set out in this table shall only be accepted at the Transfer Facility providing that a suitable recovery or disposal option has been predetermined.  The permitted wastes shall only possess one or more of the following hazardous properties: <ul style="list-style-type: none"> <li>• HP2 – Oxidising</li> <li>• HP3 – Flammable</li> <li>• HP4 – Irritant</li> <li>• HP5 – Harmful</li> <li>• HP6 – Toxic</li> <li>• HP7 – Carcinogenic</li> <li>• HP8 – Corrosive</li> <li>• HP9 – Infectious</li> <li>• HP12 – Substances and preparations which release toxic or very toxic gases in contact with water, air or an acid</li> <li>• HP15 – Substances and preparations capable by any means, after disposal, of yielding another substance, e.g. a leachate, which possesses and of the characteristics listed above</li> <li>• HP14 – Ecotoxic</li> </ul>

W1 as shown on the plan in Schedule 7	Treated liquid effluent from the biological treatment plant, and roof and surface waters via the treatment plant.	Suspended solids	75 mg/l (winter period) <sup>1</sup>	Monthly analysis of bulk daily sample.	Continuous flow proportional sample over 24-hours.	As per Technical Guidance Note (Monitoring) M18: Monitoring of discharges to water and sewer or other method as agreed in writing with the Regulator.
			60 mg/l (summer period) <sup>2</sup>			
		Total ammonium as N	20 mg/l (winter period) <sup>1</sup>	Spot sample	Daily	
			15 mg/l (summer period) <sup>2</sup>			
		Biochemical oxygen demand (5 day)	75 mg/l (winter period) <sup>1</sup>	Visual inspection	Monthly	
			40 mg/l (summer period) <sup>2</sup>			
		Oils and grease	No visible release	Visual inspection	Daily	
		Temperature	≤24°C	Spot readings	Three readings per day reported as daily averages	
pH	6 to 8.5	Continuous	Continuous, reported as daily averages			
Flow	39 l/second					
		2500 m <sup>3</sup> /day		Continuous		

Footnote 1: winter period is defined as 01 October to 31 March.

Footnote 2: summer period is defined as 01 April to 30 September.

# Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

## Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

<p><b>(a)</b></p> <p><b>Notification requirements for any activity that gives rise to an incident or accident which significantly affects or may significantly affect the environment</b></p> <p><b>Or</b></p> <p><b>any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution</b></p>	
<b>To be notified within 24 hours of detection</b>	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

<b>(b) Notification requirements for the breach of a permit condition</b>	
<b>To be notified within 24 hours of detection</b>	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	

Measures taken, or intended to be taken, to stop the emission	
---	--

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment: To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

**Part B - to be submitted as soon as practicable**

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

<b>Name*</b>	
<b>Post</b>	
<b>Signature</b>	
<b>Date</b>	

\* authorised to sign on behalf of the operator

## Schedule 6 - Interpretation

“*accident*” means an accident that may result in pollution.

“*Annex I*” means Annex I to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“*Annex II*” means Annex II to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“*application*” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“*authorised officer*” means any person authorised by Natural Resources Wales under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“*building*” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“*disposal*” or “*D*” means any of the operations provided for in Annex I to Directive 2008/98/EC of the European Parliament and of the Council on waste.

“*emissions to land*” includes emissions to groundwater.

“*EP Regulations*” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“*emissions of substances not controlled by emission limits*” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission or background concentration limit.

“*groundwater*” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“*hazardous property*” has the meaning in Annex III of the Waste Framework Directive

“*hazardous waste*” has the meaning given in the Hazardous Waste (Wales) Regulations 2005 (as amended)

“*hazardous substance*” means a substance classified as hazardous as a consequence of fulfilling the criteria laid down in parts 2 to 5 of Annex I to Regulation (EC) No 1272/2008

“*Industrial Emissions Directive*” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions

“*MCERTS*” means the Environment Agency’s Monitoring Certification Scheme.

“*Pests*” means Birds, Vermin and Insects.

“*quarter*” means a calendar year quarter commencing on 1 January, 1 April, 1 July or 1 October.

“*recovery*” or “*R*” means any of the operations provided for in Annex II to Directive 2008/98/EC of the European Parliament and of the Council on waste.

‘*residue*’ means the solid waste generated by the waste treatment activity and is not directly related to the type of waste treated in the plant

“*Waste code*” means the six digit code referable to a type of waste in accordance with the list of wastes established by Commission Decision 2000/532/EC as amended from time to time (the ‘List of Wastes Decision’) and in relation to hazardous waste, includes the asterisk.

“*Waste Framework Directive*” or “*WFD*” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

“*Waste Treatment BAT Conclusions*” means the BAT Conclusions for the Waste Treatment sector published as a Commission Implementing Decision EU 2018/1447 in the Official Journal of the EU on 17 August 2018

“*WEEE*” means waste electrical and electronic equipment.

“*WEEE Directive*” means Directive 2012/19/EU of the European Parliament and of the Council of 4th July 2012 on waste electrical and electronic equipment (WEEE).

“*year*” means calendar year ending 31 December.

Unless otherwise stated, any references in this permit to concentrations of substances in emissions into air means:

- (a) in relation to emissions from combustion processes, the concentration in dry air at a temperature of 273K, at a pressure of 101.3 kPa and with an oxygen content of 3% dry for liquid and gaseous fuels, 6% dry for solid fuels; and/or
- (b) in relation to emissions from non-combustion sources, the concentration at a temperature of 273K and at a pressure of 101.3 kPa, with no correction for water vapour content.
