How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

Criteria	Action needed	Complete by
C2	Please ensure all vehicles stored in the main yard are fully depolluted as per condition 2.1.2 of the site permit	14/07/2021

Action criteria codes are listed in the 'Important information' section below.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

On the **16th June 2021**, a routine unannounced site inspection was conducted at H K Motors, Ruabon, by **Boguslaw Pierzchala**, waste regulation officer, and **Kathryn Bradshaw**, hazardous waste officer.

The site manager, Ian Williams, was present for part of the inspection

The site appears well-managed and tidy. End-of-life vehicles are stored in rows, or stacks.

The depollution area was checked, all hazardous fluids and batteries were stored within the correct containers.

A number of cars were checked and all but one had been fully depolluted, as shown in the photo below.

This was brought to the attention of Mr Williams.

Please ensure all cars stored on a hardstanding or impermeable surface are fully depolluted as per condition 2.1.2. of the site permit.

During previous the inspection it was noted that some cars on the verge at the rear of the site had not moved for over two years (pre 31st August 2017). The verge was checked again during this inspection and the cars had been removed.

Please ensure vehicles are not stored over the permitted limit as per The Landfill Directive 1993/31/EC which states that the maximum storage times for waste stored at a site are one year

prior to disposal and three years prior to recovery; you must ensure that waste vehicles on site do not exceed these timeframes.

It states in section 1.5.4 of the EMS, that depolluted motor vehicles will be stored up to a maximum of 24 months.

Hazardous waste aspect of the operations was checked and no issues were identified.

Thank you for your time during the inspection. Please find my contact details below.

Kind regards,

Boguslaw Pierzchala

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

What are suspended scores?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
