Attn: Tyrone Ward

Dear Tyrone,

Re: EAWML30058 and DP3733BK – Docksway Disposal Site. Latest Area 1 and 2 Surface Water Monitoring Results, Round 206.

We write to provide details of the results of surface water monitoring undertaken at Docksway Disposal Site in April 2021 (Round 206).

With this letter report we enclose summary tables giving field observations and selected field test results for each of the surface water positions. The analytical certificates for the laboratory testing carried out during this monitoring round are included with this report.

Surface water sampling was carried out at six locations during Round 206, see Table 1 below.

Table 1 Details of Locations Sampled during Round 206

Position Monitored	Location
SW1A	River Ebbw Upstream
SW24	Oxbow Lake Position 1
C3_Asb	Cell 3 settling lagoon

Note: SW02 and SW7 were not monitored during this round due to unsafe access.

Samples were not obtained from locations SW25 (Area 1 surface water) and SW26 (Area 2 surface water) due to these locations being dry.

Location SW23 (Discharge to Maes Glas Pill from Docks Drain Outfall) was also noted by the field technician to be dry.

Surface Water Quality Assessment

Table 2 below shows selected testing results for Round 206. There are no compliance limits set for surface water and therefore there is no commentary regarding the results.

Table 2 Testing Results Summary for Round 206

Monitoring Location	Field Temperature (°C)	Lab pH	Ammoniacal Nitrogen (mg/l)	Field Dissolved Oxygen (%)	BOD (mg/l)	Suspended Solids (mg/l)	Chemical Oxygen Demand (mg/l)
SW1A	8.10	8.46	<0.2	98.6	1.85	N/A	<7
SW24	9.10	8.17	<0.2	88.7	<1	N/A	27.7
C3_Asb	9.55	8.14	1.1	72.3	<1	<2	82.6

 Registered in England No. 01188070

Locations SW25 and SW26 were not sampled, therefore there is no commentary regarding compliance with the discharge consents for these locations.

The field operative did not record the presence of a sheen during sampling at C3_Asb and the laboratory did not detect asbestos fibres in the sample from C3_Asb. The surface water quality within C3_Asb was also within the Permit limits during Round 206 for the parameters tested.

Concluding Remarks

Newport City Council (NCC) will continue to monitor the surface water quality on and around Docksway Disposal Site in accordance with the aftercare monitoring plan for Area 1, the Environmental Permit, and in accordance with the relevant discharge consent limits. Stantec will continue to provide commentary on water quality with reference to point source emission limits to water (Table S3.2 of the Permit), and discharge consent limits within subsequent reports.

If you have any questions regarding the investigations carried out or the data herein, then please do not hesitate to contact us.

Yours sincerely

Kate Riley
Senior Associate

on behalf of Stantec UK Ltd
