Dear Sir

**Application for Standard Rules Environmental Permit SR2010 No. 12 –  
Treatment of Waste to Produce Soil, Soil Substitutes and Aggregate**

Please find enclosed the completed relevant application forms and associated supporting documents required for the application of a Standard Rules Environmental Permit. The application is for the Standard Rules Permit SR2010 No.12 - Treatment of Waste to Produce Soil, Soil Substitutes and Aggregate. The application form is accompanied by the requisite fee, in the form of a cheque for £1,630.00, which has been taken from the charging scheme guidance for this financial year.

The site has been active for some time under exemptions without adverse effect on the local environment or cause for nuisance complaint from the surrounding population. The proposed operational activities are relatively small scale and are not considered to increase environmental risk to the site and surrounding area significantly, furthermore, given the current operational activities and associated permissions issued to neighbouring sites/operators it is envisaged that the risks are proportional.

I trust the submission made is sufficient and look forward to your prompt confirmation and swift determination of this application. Should you have any queries or require any further information please do not hesitate to contact me.

Yours faithfully

P J Bowles
