Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation increases the maximum amount of bulk anhydrous ammonia storage allowed on site from 1000 kg to 2000 kg or 2 tonnes. There is no change to the emissions from the site due to the variation.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
