Dredging

Is your application for capital or maintenance dredging? Capital dredging is the removal of material that has not previously been dredged or has not been dredged in the last 10 years. This includes deepening or widening an existing dredge area. Maintenance dredging relates to the removal of material from areas which have previously been dredged (in the last 10 years) i.e dredging the same areas and to the same depth as before.

Maintenance dredging

Please provide the following details:

The last licence/application number DML1421

When sediment analysis was last undertaken Presumed 2014

When the area was last dredged March 2017

If this is to support a renewal of a marine licence, state if there are any proposed changes to operation since the last licence

No proposed changes

Will the dredged material be disposed to sea, beneficially used, or used for another purpose?

Beneficially used

If disposal at sea, provide the name and code of the proposed disposal site
