

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Tata Steel UK Limited

**Morfa Non-Hazardous Landfill
Port Talbot Installation
Port Talbot Works
Port Talbot
West Glamorgan
SA13 2NG**

Variation number

EPR/BV7311IE/V007

Permit number

EPR/BV7311IE

Morfa Non Hazardous Landfill

Permit number EPR/BV7311IE

Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is a permit variation which will regularise the emissions monitoring tables as described within Schedule 3 of the permit, to reflect the currently agreed monitoring programme adopted by the Operator, and as subsequently agreed with the Local Regulating Officer for the site.

This variation seeks to update the monitoring tables specified within Schedule 3 of the permit, in order to ensure that the permit's monitoring requirements are clear and consistent in future.

The rest of the installation is unchanged and continues to be operated as follows:

The installation in its entirety consists of the whole steel works including the Morfa non-hazardous and Morfa hazardous landfills. This permit is for the Morfa Non-Hazardous Landfill which is an existing in-house waste management facility which accepts waste produced exclusively by Tata Steel UK Ltd. The non-hazardous wastes mainly comprise of steel slag, with flue dusts, water treatment solids, office waste, canteen wastes and demolition rubble arising from steel production at Port Talbot Steel Works, South Wales. The permitted maximum annual input is 500,000 tonnes. 12 of the Cells will receive non-biodegradable waste and 1 Cell will be designated for biodegradable wastes.

Only Cells 1, 2 and the Biodegradable cell are currently operational.

The western boundary comprises a series of coastal barrier dunes on the seaward edge, whilst the southern edge of the site is within 130 metres of the Kenfig National Nature Reserve, both of which are part of an EC protected nature reserve. The eastern boundary is defined by the low-lying Margam Moors which is a registered SSSI.

The permit was varied (KP3033MC) in December 2006 to accommodate an in-house waste treatment plant to sort and divert wastes from the landfill, and to include additional wastes to be accepted under the permit.

The schedules specify the changes made to the permit. Schedule 1 of the notice specifies the conditions that have been varied and Schedule 2 comprises a consolidated permit which reflects the changes being made.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Description	Date	Comments
Application BV7311IE received	09/10/03	
Request to extend determination	Received 07/05/04	07/06/04
Permit determined	17/12/04	
Variation Application KP3033MC received	14/08/06	Variation to include an in-house waste treatment plant and additional waste types
