

APPLICATION FOR A MARINE LICENCE FOR MARINE WORKS

Marine Works include, but are not limited to, coast defences, beneficial uses of dredged materials, subsea cables, pontoons, jetties, land reclamation, grab samples and outfall pipes under the Marine and Coastal Access Act 2009

Please read the notes carefully before completing the form.

- The Marine Licensing Team (MLT) administers Part 4 of the Marine and Coastal Access Act 2009 on behalf of the Licensing Authority, the Welsh Ministers.
- The completed application form must be accompanied by a location plan and, where appropriate, descriptive drawing(s) and any supporting environmental assessments. One completed hard copy of the application and supporting documents will always be required. Additional copies are required for consultation purposes.
 - For application and supporting documents less than 10MB we can accept an additional copy via email.
 - For applications larger than 10MB **16** additional copies in CD/DVD format will be required
 - When applications and supporting documents are hard copy only **16** copies will be required.
- Please submit applications to the **Permit Receipt Centre** via the details at the top of this form
- Please submit marine licence applications, including this form and all supporting documents, **at least 4 months before the licence is required.**

Some projects may raise matters that require a significantly longer time for consideration. These are most likely to be:

- Projects that fall **within** The Marine Works (Environmental Impact Assessment) Regulations 2007 – as amended requiring an Environmental Statement
- Large scale projects with substantial volumes of material being deposited or excavated
- Works requiring an Appropriate Assessment to be conducted under The Conservation of Habitats and Species Regulations 2017.
- Information should be provided about the anticipated **duration of the entire project** in respect of works below/seaward of Mean High Water Spring (MHWS). Where appropriate, planned phasing of the work for which consent is sought must be detailed. For projects lasting more than one calendar year, planned phasing details must be given for each 12 month period.

A licence fee is payable in respect of an application. Details of fees can be found on our web pages.

Please note applications will not be processed without the correct relevant fee or invoicing details.

- Payments can be made via Cheque, BACS or credit/debit card.
 - Cheques should be crossed and made payable to **Natural Resources Wales.**
 - For BACS payments ensure you provide the reference number (not remittance number)

- For credit/debit card payments please complete the CC1 form and submit with the application. The CC1 form can be found on our web pages

Further information on payment methods can be found on our web pages

- **All activities need to comply with the Water Framework Directive (WFD). The framework and guidance can be found on the Natural Resources Wales website, <http://naturalresources.wales>. The results of your WFD assessment must be attached to your marine licence application.**
- Please answer all questions. If any information is not available at the time of application please indicate in the relevant section, giving reasoning in a covering letter. Outstanding details must be submitted as soon as possible. Any delay in forwarding details is likely to result in delays in determining your application.

Your application may not be considered complete and therefore not processed until key information has been submitted. Your application may be returned if you fail to submit outstanding information within given timescales.

- Please note any licence may have conditions that must be discharged before works can commence. This will take additional time.
- If you have any queries with regards to completing this application please contact the MLT: marinelicensing@naturalresourceswales.gov.uk

How your application will be processed by the MLT:

- Submit all application to the **Permit Receipt Centre** via the details at the top of this form.
- Checked and acknowledged by the MLT within 21 days of receipt of application and payment
- If the application is complete and no further information is needed at this time, your application will be placed in a work queue to be assigned a permitting officer
- If the application is not complete, further information will be request and need to be provided before the application can be considered as complete
- Our **4 months** service level for determining non-EIA applications will begin from the date the **completed** application is received (*Please note some projects may take significantly longer than 4 months to determine due to their nature*)
- EIA projects may take significantly longer due to their scale and complexity. Therefore we encourage early engagement with the MLT
- Your application and supporting documents will be sent to for an initial consultation period of 28 days (*42 days for EIA projects*)
- For the majority of projects, a public notice must be advertised. Public consultation will be 28 days (*49 days for EIA projects*).
For EIA projects a second public notice will be required. The MLT will advise on how this should be done.
- Responses to consultation will be considered and additional information requested at this time, if necessary.

- A decision on your Marine Licence Application will be made

All information submitted may be referred to within a licence, therefore all works must be in accordance with this information, unless otherwise agreed with NRW acting on behalf of the Licensing Authority during the determination process.

It is the responsibility of the applicant to obtain any other consents/authorisations that may be required.

Application Form Structure

1. Project Description and Cost
2. Applicant Details
3. Details of Agent, Contractor, Vehicles and/or Vessels used to carry out works
4. Environmental Impact Assessment (EIA)
5. Licensable Period
6. Project Description
7. Methods Statement
8. Materials of Project
9. Beach Replenishment, Land Reclamation or Salt Marsh Feeding
10. Temporary Works
11. Dredge and Disposal of Dredge Material
12. Protected Sites
13. Other Consents
14. Statutory Powers
15. Public Register
16. Application Fee
17. Declaration

Check List

Please ensure that you have included all the necessary information before you submit your application. **If any of the below are not completed in the application form, the application is likely to be considered incomplete and may be returned to you**

Item	Yes (✓)
The applicant is a legal entity?	yes
The declaration is signed by the applicant?	yes
Is the application fee correct?	yes
Are the grid references/coordinates correct?	yes
Do the coordinates match map locations?	yes
Have all the relevant supporting documents been submitted?	yes
Has a clear methodology been provided in the application form?	yes
Has Protected sites information been included?	yes
Has a Water Framework Directive (WFD) assessment been submitted?	yes
Are all the continuation sheets for application questions appended with correct corresponding numbers?	yes

Should you have any queries regarding your application please contact the MLT via marinelicensing@naturalresourceswales.gov.uk

1. Project Description and Cost

1 (a). Project Name

Câr-Y-Môr – 3 hectare Seaweed and Shellfish IMTA site in Ramsey Sound

1(b). Please provide a brief description of the proposed project, including location

Following the successful operation of two Seaweed and Shellfish IMTA trial farms for the last year, the Community Benefit Society, proposes to scale up with an additional 3 hectare site just north of the Carn ar wig trial site, within Ramsey Sound, south of St Justinians Life boat station. This site has been chosen as it has similar marine environmental characteristics to the Carn ar wig trial site. The new site will be deployed in two phases over two years using a standard trot mooring system. Continual environmental monitoring will be carried out. Subject to showing positive environmental impact this farm will be maintained and operated for the foreseeable future as a template farm for others to duplicate and improve the environmental benefits this zero input organic ranching can deliver in our ocean

1(c). Please provide an estimated gross cost of the project (Inc. materials and labour) for works that fall below/seaward of Mean High Water Springs (MHWS)

£200,000 for equipment and stock in the first two years. All labour is provided by volunteerers who are skilled and experienced in marine operations at this location

2. Applicant Details

To whom the licence will be issued. *This must be a legal entity such as an individual, registered company/ charity or public body.*

Title	Mr	Full Name	Owen Haines
Company or Trading Name	For the Love of the Sea Limited trading as Câr-Y-Môr		
Company Registration Number (if applicable)	RS008172		
Name of Contact or individual (if different)	Owen Haines		
Position in Company	Full time Volunteer and Director		
Address inc. postcode (provide registered Company address if applicable)	Câr-Y-Môr, Clegyr Uchaf, St Davids, Haverfordwest Pembrokeshire SA626QN		
Telephone Number	07399 210163		
Email Address	admin@carymor.wales		

3. Details of Agent, Contractor, Vehicles and/or Vessels used to carry out works

3(a). Agent Details

This is who we will correspond with unless otherwise informed. If no agent we will contact the applicant.

Title	<input type="text"/>	Full Name	<input type="text"/>
Company or Trading Name	<input type="text"/>		
Company Registration Number (if applicable)	<input type="text"/>		
Name of Contact or individual (if different)	<input type="text"/>		
Position in Company	<input type="text"/>		
Address (Inc. postcode)	<input type="text"/>		
Telephone Number	<input type="text"/>		
Email Address	<input type="text"/>		

3(b). Does the Applicant wish to be included in all correspondence? Yes ☒ No ☐

3(c). Contractor Details

In order for contractors to benefit from the licence permission, details must be provided. Any details not provided with application must be confirmed before operations commence.

Contractor Company or Trading Name	Address
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

3(d). Will the works require the use of vessels?

Yes ☒

No

☐

3(d) (i). Vessel Details (if applicable and available)

In order for contractors to benefit from the licence permission, details must be provided.

Any details not provided with application must be confirmed before operations commence.

Operator	Name of Vessel	Type of Vessel	Vessel Registration Number	Country of Registration
Robust Boats	Grafter	Aluminium Coded work boat	MIQC6	Wales

3(e). Will the works require the use of vehicle?

Yes ☐ No ☒

3(e) (i). Vehicle Details (if applicable and available) to be used below MHWS

In order for contractors to benefit from the licence permission, details must be provided.

Any details not provided with application must be confirmed before operations commence.

Operator	Type/Description of Vehicle

3(f). If the contractor or vessels or vehicles are not known at the application stage, when do you expect to provide these details?

These details will need to be confirmed prior to the licence and operations commencement

N/A

4. Environmental Impact Assessment (EIA)

Certain projects, due to their scale, location and/or nature, may require an EIA under the Environmental Impact Assessment Directive (Directive 85/337/EEC – as amended). If a project qualifies under EIA, an Environmental Statement (ES) must be prepared and submitted with the application.

Projects that fall within Annex I of the Directive automatically require an EIA. Projects that fall within Annex II of the Directive are assessed on a case-by-case basis for the requirement for an EIA to be undertaken.

4(a). Do you consider the works to be under the Environmental Impact Assessment Directive (Directive 85/337/EEC – as amended)? Yes ☒ No ☐

☐

4(a) (i) If Yes, which Annex does the proposal fall under? Annex I ☐ Annex II ☒

4(a) (ii) Which number(s) within the Annex does the proposal relate to?

Annex II (1) Agriculture, silviculture and aquaculture - however this is NOT intensive finfish aquaculture – this is seaweed and shellfish (which are exempt)

In reality this type of Ocean farming should be more accurately described as “Zero input organic ranching within small fields in our ocean growing native Seaweed and shellfish” - because there are no fences its an open resource for all marine life to pass through benefitting from the new marine ecosystem the local community wishes to create following on from the trial farms.

Ideally the authorities should create a new less arduous classification for this activity but in the meantime this community group must do their best to obtain a Band 2 Marine License and pay the application fee.

4(c). Has an Environmental Impact Assessment been undertaken? Yes ☒ No ☐

4(c)(i). If Yes, has an Environmental Statement been submitted to support this Marine Licence application? Yes ☒ No ☐

4(d). If an Environmental Impact Assessment has been undertaken, but an ES has not been submitted, please provide an explanation

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

5. Licensable Period

Determination of applications will be based on the works taking place during these dates. Please ensure you have included an adequate contingency period. If works are not completed by the Requested Licence Expiry Date you may be required to submit a new application. *Including a contingency period within your original application does not impact on Licence Fee*

Start Date 1st December 2021

Requested Licence Expiry Date 1st December 2041

Please ensure you submit your application for a Marine Licence **at least 4 months** prior to the intended start date. Some projects, such as EIA projects, will take significantly longer to determine.

6. Project Description

6(a). Please give a description of the proposed project.

This should include the purpose of the project, estimated timescales of construction and operation, and broken down by the phases of works, if applicable.

Details should include, but not be limited to, dimensions of project, quantity of material being deposited and removed.

Project purposes:

- Continual monitoring and research of the environmental impact of this first 3 hectare Seaweed and Shellfish IMTA farm in Wales – in collaboration with WWF and Bangor, Swansea and Aberystwyth Universities and Plants Ecology Beyond Lands Sealens environmental monitoring system
- Develop the best growing gear and work practises for farming local species of seaweed and shellfish to make this a commercially viable Community business creating full time employment
- Simplify and streamline the consent process for commercial scale Seaweed and Shellfish IMTA farming
- Be an open resource for all stakeholders to encourage cooperative duplication around the welsh coast to mitigate climate change and create jobs and sustainable healthy seafood

Timescale:

- Dec 2021 to Jan 2021 – deployment of mooring and growing equipment in phase1 area (100m by 125m section within 3 hectare site)
- Dec 2021 – Oct 2022 - Operating and environmentally monitoring in phase 1 area.
- Oct 2022 to Dec 2022 – deployment of mooring and growing equipment in phase 2 area (100m by 125m section within 3 hectare site)
- Dec 2021 – Oct 2041 - Operating and environmentally monitoring phase 1 and 2 areas

Material deposited or removed:

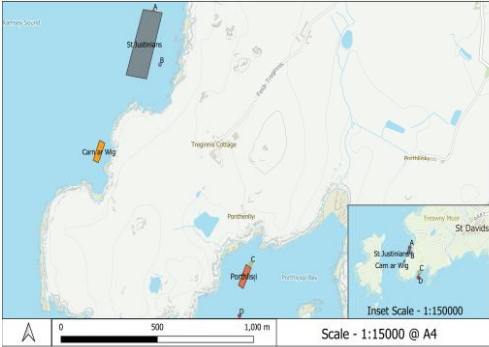

On each phase 1 and 2 no material is deposited or removed. The mooring and growing equipment deployed is listed in [3.2.2 Proposed physical farm structures](#) of the attached Environmental Impact assessment (extend this box for more detail please.....)

Estimate average two boat visits a week to the farm from St Justinian mooring which is 0.25 mile each way for all farm operations for the duration of the license

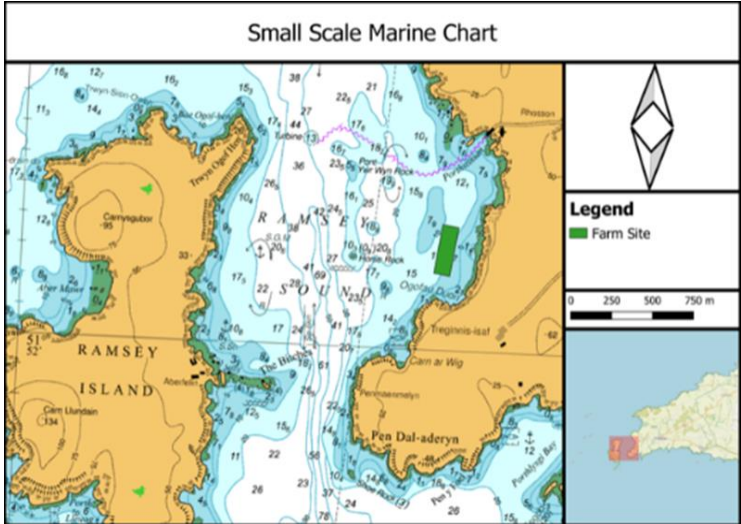

Only other items introduced to the site are seeded lines of local species of seaweed and juvenile bivalves (native species) – Mussels to be collected by natural settlement on settlement droppers suspended from the headlines – Estimated quantity of native oyster juveniles up to 200 kgs per year.

Only other items being removed are harvestable seaweed and shellfish. – Estimate up to 15 tonnes of seaweed and 3 tonnes of shellfish per year.

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

Scale - 1:15000 @ A4

St Justinians Proposed Site
Coordinates use WGS84 reference coordinate system.

Longitude	Latitude
-5.312440965606686	51.87332853640763
-5.3137350082397505	51.87070162364426
-5.3121900558471715	51.87054263792684
-5.311006965606687	51.87319753571296

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

6(c). The following must be provided with the completed application form:

- (i) a suitably scaled extract of an Ordnance Survey Map or Admiralty Chart with location of project, complete with **North Arrow** and **Scale**
- (ii) construction plans and sectional drawings showing those proposed works below/seaward of MHWS, which should give details of the materials to be used (for beach replenishment the quantity, particle size and source of material to be deposited and deposit location is also required).
- (iii) a descriptive schematic drawing and suitably scaled location plan which show the full extent of the project clearly in relation to the surrounding area and features.

Please list below **all supporting documents** that have been submitted with this application, including suitable documents/maps/drawing titles and reference numbers

ALL WITHIN FINISHED ATTACHMENTS FOLDER

email from Marine Licensing dated 23rd July 2021 15:17 – Joe Thomas

Car y Mor Environmental Impact Statement

210730 WFD scoping application

Car Y Mor Navigational Risk Assessment pdf

Biosecurity plan. Visual impact assessment. Marine mammal entanglement protocol

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

The applicant should note that these drawings/plans may be copied to others as part of the MLT's consultation procedures. If they are subject to copyright, it is the **responsibility of the applicant to obtain the necessary approvals to reproduce the documents and to submit up to 16 copies with the application.**

7. Methods Statement

7(a). Please provide a detailed method statement for the works

This must include methods for all works including temporary structures or deposits such as jetties, cofferdams, moorings or landing stages to be constructed seaward of MHWS

As specified in [3.2.2 Proposed physical farm structures of the attached Environmental Impact assessment](#) - The Anchors, Groundchains, navigational buoys and growing equipment will be deployed and maintained during the term of the license by Câr-Y-Môr members who are experienced marine contractors using Robust Boat's coded moorings work boat. This work boat is moored at St Justinians. On average this one vessel will visit the site once per week during the licensed period to carry out all works and routine service checks. Several members are commercial divers and a drop down camera and underwater drone are available for the regular inspections. Several other Câr-Y-Môr members operate licensed fishing and work boats so there will always be vessel and marine operator cover when required. All mooring equipment will be deployed and maintained as required with optimal care using lifting equipment to minimise seabed disturbance.

7(b) (i). If Yes, what type(s) of activities will be undertaken?

7(b) (ii). If Yes, approximately how many days will the activity be undertaken for?

If Yes, you will be required to complete an additional form that will be provided.

7(c). Please state the measures to be taken to:

- (i) Minimise risk to the marine environment

A test of Likely Significant Effect (TLSE) and appropriate assessment has been carried out to identify risks of this 3 hectare Seaweed and Shellfish farm (IMTA).

We consider that beyond all reasonable scientific doubt, there will be no adverse effect on the integrity of any European Marine Site, either resulting from the predicted effects of the plan or project on its own or when those predicted effects are considered in combination with the effects resulting from other relevant plans or projects. This has also been confirmed by Câr-Y-Môr operating the two trial farms, for a year, nearby at Carn ar wig and Porthlysgy. Additionally the site will be continually monitored remotely (Using the Sealens system currently being developed by another member to monitor flow, sound and visual data), by divers and ROVs. If any concerning issues are identified corrective actions will be taken.

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

8. Materials of Project

8(a). Description of materials to be deposited seaward of MHWS (Please tick all that apply)

Timber	<input type="checkbox"/>	Iron/Steel	<input checked="" type="checkbox"/>	Concrete	<input type="checkbox"/>	Biocides/other chemicals	<input type="checkbox"/>
Silt	<input type="checkbox"/>	Stone/Rock	<input type="checkbox"/>	Gravel	<input type="checkbox"/>	Plastic/Synthetics	<input checked="" type="checkbox"/>
Sand	<input type="checkbox"/>	Other	<input checked="" type="checkbox"/>				

If other, please provide a description of materials.

Other is monitoring equipment (All secured to head lines) seaweed spores and local/native juvenile shellfish

8(b). Delivery method of materials to site

If sea delivery, please include details of vessels to be used with a chart of proposed route and transshipment area. If vehicle delivery, please provide the proposed access route.

On two occasions mooring equipment will be delivered by pick up to St Justinians life boat stations and then taken by Robust Boats Mooring work boat the 500 meters due South west to the proposed site. Also annually a few kgs of seaweed spores and juvenile shell fish will be delivered by the same route. The marine contractor members have all operated in Ramsey Sound for decades. This 500 meter route can be seen on the plan in the EIS

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

8(c). Will the works involve removals seaward of MHWS? Yes ☒ No ☐

8(c) (i). Description of materials to be removed seaward of MHWS (Please tick all that apply)

Timber	<input type="checkbox"/>	Iron/Steel	<input type="checkbox"/>	Concrete	<input type="checkbox"/>	Biocides/other chemicals	<input type="checkbox"/>
Silt	<input type="checkbox"/>	Stone/Rock	<input type="checkbox"/>	Gravel	<input type="checkbox"/>	Plastic/Synthetics	<input checked="" type="checkbox"/>
Sand	<input type="checkbox"/>	Other	<input checked="" type="checkbox"/>				

8(c) (ii). Description of objects/materials to be removed seaward of MHWS

Including quantities to be removed.

Any plastic waste found on site will always be collected and removed. We plan also to trial a waste plastic collector and report findings.
Other refers to harvesting farmed seaweed and shellfish .

9. Beach Replenishment, Land Reclamation or Salt Marsh Feeding

For works involving any of the above, please provide the following information

9(a). Is the material to be deposited like for like to existing material? Yes ☐ No ☐

9(a)(i) If No for Beach Replenishment please provide justification why?

Not applicable

9(b). Description of material to be deposited

Please provide the grading specification of materials to be used, if using a range of grain sizes please state the percentage by weight passing. *If unsure, please refer to the Wentworth Scale*

Not applicable

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

9(c). Source of the material to be deposited

Including dredged or land based stating the origin of material

Not applicable

9(d). Has the material been chemically analysed?

Yes ☐ No ☐

If material has been analysed, we may request this information to determine the application

9(d) (i) If Yes, is the analysis data been included with the application? Yes ☐ No ☐

10. Temporary Works

10(a). Will there be any temporary deposits below MHWS?

Yes ☒ No ☐

This includes construction materials, removed objects/material, jetties or cofferdams

If **Yes**, please continue with section 10

10(b). Please provide the location of temporary deposits

Please include a map/chart displaying the location of temporary deposits, if necessary.

Occasionally (notably in storm conditions) small amounts of local seaweed and shell fish may come unattached and drop to the seabed on the 3 hectare area of seabed. The current speeds that have been measured at the proposed site will continually move any deposits keeping the seabed clear – additionally such deposits will also be utilised as food by the existing marine species. Please note there is no waste feed or chemicals in this form of IMTA. Further the monitoring of the seabed at the two trial farms show no evidence of such deposits.

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

11. Dredge and Disposal of Dredge Material

If you are undertaking Dredge and Disposal activities please also complete the Dredge and Disposal application form and submit together.

11(a). Do you intend to apply for a marine licence to dispose of dredged material to sea as part of the works in this application? Yes ☐ No ☒

12. Protected Sites

Licensing Authorities have a duty to ensure that projects will **not have significant adverse environmental impact**, particularly on any designated **European Site of Conservation Importance - Special Areas of Conservation (SAC) and Special Protection Areas (SPA)**, listed under the Habitats Directive (Council Directive 92/42/EEC on the conservation

of natural habitats and of wild fauna and flora). In addition, it is Government Policy that Wetlands of International Importance (Ramsar sites) are also considered as European Sites. There is a duty to take reasonable steps to further the conservation and enhancement of nationally designated sites (Sites of Special Scientific Interest (SSSIs).

12(a). Have you had pre-application correspondence with NRW, its legacy bodies or Natural England? Yes ☒ No ☐

12(a)(i). If Yes, please provide copies of correspondence with application and state which team(s) you have contacted?

Jon Moore, who is a highly respected Pembrokeshire Marine Scientist in the UK (and a Câr-Y-Môr member) has received guidance from Anne Bunker NRW Senior Marine Conservation Officer at the Haverfordwest office on several occasions. This was regarding the results of the environmental surveys he and other members have undertaken at two possible proposed sites. Following these discussions it was decided to make an application for this 3 hectare site. She has retired this summer.

Additionally in July 2021 I have emailed and had conversations with several of the marine Licensing team – notably Seran Davies and Joe Thomas – regarding pre application free advice and the requirements of Seaweed farming requiring a Band 2 application along side major construction and dredging applications

During 2020 I kindly received lots of help and guidance from Rowland Sharp NRW Marine Specialist Advisor (Fish/Fisheries) at the Bangor office to produce the

Document to inform HRA - Carymor - Ramsey Sound for the application for the trial sites .

This document has been an excellent reference while preparing the Environmental Statement (section 5 has the Information to inform HRA) Further I again spoke to Rowland on Friday 30th July 2021 and he gave wonderful support as always and clarified several queries. My thanks to all from the NRW for their continued support and I appreciate their dilemmas of having to apply the onerous legislative requirements of a band 2 license to the simple Seaweed and shellfish IMTA proposal

12(c). Please provide a description of all mitigation measures proposed to avoid any impact on designated conservation sites.

Please see section 5 of the ES attached

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

12(d). If the works are not located *within* or *likely to affect* a designated conservation site, please indicated the approximate distance to the nearest designated conservation site.

Please note that if the proposed works are in or within 2km of a European Site of Conservation Importance you will have to provide suitable mitigation measure to avoid any impact on designated conservation sites.

13. Other Consents

Please detail all consents that you have applied for or received for these works

Type of Consent	Applied for	To be applied for	Reference Number	Date of Issue and Expiry
-----------------	-------------	-------------------	------------------	--------------------------

Planning Permission under Town and County Planning Act 1990 – From Local Planning Authority (LPA)				
Name and Address of LPA for location of works				
Land Owners Consent such as The Crown Estate Consent	See Below details			
Port Authority or Local Harbour permissions				
Other NRW consents <i>such as Flood Defence or SSSI assent</i>				
Details of NRW consent				
Other consents <i>such as Transport and Works Act Order, Section 36 Electricity Act, grant/loan sanction</i>				
Details of other consents	<p>Spoken to the Crown in London (Gary Thompson) who issued the two trial licenses to Câr-Y-Môr in 2020 who advised again to deal with their Welsh agent in Bridgend</p> <p>So for 2 months have started application process with Cooke and Awkright, Bridgend – Rhian Howells (maternity leave) - now Ellie Hithings. (Last time this process took 19 months – hopefully will be quicker this time with the society's track record of successfully operating the trial sites and the Crown's agents having dealt with our trial licenses</p>			

14. Statutory Powers

14(a).Does the applicant have statutory powers to consent any aspect of the project?
 E.g. coast protection authority, dredging powers, statutory undertakers Yes ☐ No ☒

14(a)(i).If Yes, please give details and state the relevant legislation that gives these powers

15. Public Register

Under The Marine Licensing (Register of Licensing Information)(Wales) Regulations 2011 and the Environmental Impact Assessment Directive (Directive 85/337/EEC – as amended) , all information contained within or provided in support of this application will be placed on the Public Register unless NRW approve of the applicant's reasons for withholding all or part.

15. Is there any information contained within or provided in support of this application that you consider should NOT be included on the Public Register on the grounds that its disclosure:

15(a). Would be contrary to the interest of National Security? Yes ☐ No ☒

15(b). Would prejudice to an unreasonable degree you, or some other person's commercial interest of those of a third party? Yes ☐ No ☒

If **Yes** to either (a) or (b), please provide full justification as to why all or part of the information you have provided should be withheld

Please continue on a separate sheet if necessary. Please tick if you have done this ☐

16. Application Fee

16(a). What are the corresponding fee band for this application? Band 2 ☒ Band 3 ☐

16(b) Band 2 Only

Projects are charged at a fixed fee of £1920. The application will not be processed until the correct fee has been provided.

Please provide the method of payment

Method	Yes (✓)	Reference Number
Cheque		
BACS (not remittance no.)	Yes £1920	PRCAPPCARYM182
World Pay (phone or CC1)		

Please attach **CC1 Form** with application. Can be found on our web pages

16(c) Band 3 Application only

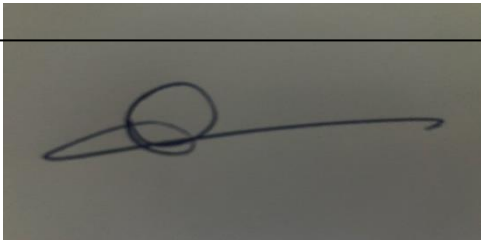

Band 3 applications are charged at on hourly rate of £120 and are invoiced in arrears. Please complete the details below which will be required for invoicing.

Customer Name	<input type="text"/>
FAO	<input type="text"/>
Purchase order number	<input type="text"/>
Address for invoice	<input type="text"/>
Telephone Number	<input type="text"/>
Email Address	<input type="text"/>

17. Declaration

I declare that to the best of my knowledge and belief that the information given in this application form and supporting documentation is true.

WARNING: It is an offence under the Marine and Coastal Access Act 2009, under which this application is made, to fail to disclose information or to provide false or misleading information and can invalidate any licence granted.

A handwritten signature in dark ink, appearing to be 'OWEN HAINES', is written over a grey rectangular background. The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Signature

Date 20/09/2021

Name (in capitals) OWEN HAINES

Position in Company Full time Volunteer, Director and one of Founder members

*Applications cannot be processed unless signed by the **Applicant** (not agent), the applicant must have appropriate level of authority within the company.*

Applications will not be processed unless signed
