Natural Resources Wales
Medium Combustion Plant Permitting Team

21 January 2021

Dear Sir/Madam,

PAN - 005141

Please find enclosed documentation relating to a variation to the above permit.

The above permit was granted to enable the business to operate '*one or more small waste incinerator plant that is also a Tranche B Specified Generator aggregated to <50MW_{th}*'

It is now apparent that the business actually needs to submit a variation to support the installation of a second small incinerator on the Ruthin site.

As such, I'm afraid to say that this application is now retrospective as the second small incinerator completed its acceptance testing process on 24th November 2020.

Yours faithfully,

Darren J G Davies
Director
