Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

The installation is a waste transfer station for hazardous waste and a non-hazardous waste operations with a site maximum throughput for the entire site of 7500 tonnes per year located at Waterside Business Park, Lamby way, Rhymney Cardiff centred at national grid reference ST 22019 78619 and operated by Biffa waste services limited.

The site will comprise of external and internal activities. External activity will comprise only of loading/unloading and the storage of redundant gas containers. The entire site will be covered by impermeable concrete or tarmac surfacing. Loading and unloading takes place within a designated area that has a sealed drainage with a 9m³ tank and can be isolated from the rest of the surface water drainage.

Internal activities are waste treatment, storage, shredding and crushing. These take place in designated bays within the buildings. Each of the bays will be situated upon impermeable concrete and each bay will have its own sealed drainage systems which drains the collected liquids to a storage tank. The collected liquid in the storage tanks will be emptied and tankered for disposal off site.

There are no channelled emissions to air. Discharge to surface water sewer will only consist of uncontaminated surface runoff and limited to 5 l/s. The discharge to surface water sewer goes through multiple oil interceptors and the source is only from external areas on site where no waste treatment or storage is to take place. The site will also have a 420m³ site drainage storage tank installed along the western boundary of the proposed site, comprised of double skinned construction and will be fitted with both high level and leak detection alarms. The tank will provide redundancy to the surface water management system during a storm event and is designed with a capacity for a 1 in 100 year storm (+30% for climate change) and will provide storage for up to a 720-minute storm, and a single connection to the surface water system, allowing inflow or outflow according to balancing requirements.

The Cardiff Waste Management Resource Centre is to replace the existing Cardiff waste transfer station located at Curran Embankment permitted as EPR/SP3031SJ.
