

# Sediment sample plan request form

## Applicant details

**Title** Mrs  
**First name** Isobel  
**Last name** Smith  
**Address** Flintshire County Council  
Wepre Drive  
Connah's Quay, Flintshire  
**Postcode** CH5 4HA  
**Mobile phone** 01352 702133  
**Email address** isobel.smith@flintshire.gov.uk

## Volume of material to be dredged (m3)

900

## Depth of the sediment to be dredged (as opposed to the water depth to be achieved)

5

## Description of the location (e.g. Holyhead Port)

Connah's Quay dock, River Dee.

## Coordinates of the dredge area(s) (individually named areas, e.g. berths, should be detailed rather than one area)

53.221479887716676, -3.0587527169146815

## Dredging

Is your application for capital or maintenance dredging? Capital dredging is the removal of material that has not previously been dredged or has not been dredged in the last 10 years. This includes deepening or widening an existing dredge area. Maintenance dredging relates to the removal of material from areas which have previously been dredged (in the last 10 years) i.e dredging the same areas and to the same depth as before.

Capital dredging

Please provide the following details:

<b>The last licence/application number</b>	N/A
<b>When sediment analysis was last undertaken</b>	N/A
<b>When the area was last dredged</b>	1980 (ish)

If this is to support a renewal of a marine licence, state if there are any proposed changes to operation since the last licence

N/A

Will the dredged material be disposed to sea, beneficially used, or used for another purpose?

The purpose of sediment sampling is to ascertain whether any contamination is present, and that will then dictate whether present contaminants prevent dredging out to estuary (also SSSI), whether it is contaminated (an restriction apply on disposal, dependent upon contaminants). If dredging is not approved then there is a potential mitigation site, but until we know whether contaminated, we cannot make progress on this.

If disposal at sea, provide the name and code of the proposed disposal site

TBC

If beneficial use, how will the material be used and what is the proposed deposit location? Provide name of location and coordinates

N/A

What material is the likely composition of the dredge sediment e.g. silt, gravel? Provide proportions of the different types of material if relevant

100% silt

Provide details of any previous exclusions from dredging/disposal/beneficial use/re-use

N/A

## Application fee

Please provide the method of payment

BACS

**Reference number (not BACS remittance number):**  
OEL\_FINCON1021\_QTE\_V01

Please complete the details below which will be required for invoicing

<b>Customer name</b>	Ross Griffin
<b>FAO</b>	Ross Griffin
<b>Purchase order number</b>	OEL_FINCON1021_QTE_V01
<b>Address for invoice</b>	River Office, Severnside Park Epney -
<b>Telephone number</b>	07878363635
<b>Email address</b>	ross.griffin@ocean-ecology.com

## Declaration

If you would like a copy of your completed form, please provide your preferred email address below:

ross.griffin@ocean-ecology.com

I declare that the information in this application is true to the best of my knowledge. I understand that this application may be refused, or approval withdrawn if I give false or incomplete information.

Please type your name and date this form to confirm that the information you have provided is correct.

<b>Name</b>	Ross Griffin
<b>Date</b>	15/11/2021
<b>Position in company</b>	Ocean Ecology Limited
