## **Non-technical summary**

This Non-Technical Summary supports an application for a Bespoke Environmental Permit, to allow for the acceptance and treatment of inert and excavation waste at Tazrock Ltd, Unit 3, Hirwaun Industrial Estate, Hirwaun, Aberdare, CF44 9UP.

The waste accepted at the site comprises only of non-hazardous tarmac materials. The site has applied for a throughput of 100,000T across any given year.

The operations and activities will be the same as other types of this nature in the sense that waste will be accepted and bulked up in readiness for treatment and onward recovery.

The area to be used for the treatment of materials is already available and benefits from the required hardstanding.

The site will be operated in line with a comprehensive management system and risk assessment that has been updated. The EMS, in addition to incorporating the waste acceptance procedures; will identify and minimise the risk of pollution from the site operations including any accidents, or non-conformances.

There will be a daily routine of noise, dust and debris monitoring across the site, the haul roads that service the facility and the area outside the boundary ensuring that any pollution events off site, do not occur and are minimised where possible.

No burning of wastes will be carried out at any stage.

It is proposed that the R and D codes on the permitted site are as follows:

**D15:** Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced)

**R13:** Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)

**D9:** Physico-chemical treatment not specified elsewhere in Annex IIA which results in final compounds or mixtures which are discarded by means of any of the operations numbered D1 to D8 and D10 to D12

**R3:** Recycling/reclamation of organic substances which are not used as solvents

**R5:** Recycling/reclamation of other inorganic materials
