Dear Charlotte,

**Re: Licence application number PAN-015517
Renewal of abstraction licence MD/054/0001/004**

Following our talk this morning I write as discussed about the various points you brought up.

1. Please add Mrs Emily Freeman-Attwood as licence holder.
2. Please find attached the Excel abstraction returns for 2019/2020 and 2020/2021
3. I am happy for the licence duration to be 12 years and not LDL.
4. With regard to the abstraction amounts on the existing licence.
We are not asking for any increased water use.

Whilst we need the instantaneous rate (**150 litres per second**), and the cubic meters per day (**12,960 cubic metres**) to be maintained, nevertheless the annual abstraction number is not necessary to maintain at 2,851,200 cubic metres per year. My normal abstraction is under 2,000,000 cubic meters per year.

I would therefore be happy for the maximum amount to be abstracted in a year to be reduced to **2,250,000 cubic meters a year**. That leaves us a little leeway if we were to get extremely wet years to come, which may come to pass through global warming predictions.

With kind regards,

Julian and Emily Freeman-Attwood
