

Application for an environmental permit – Part C3 – varying a bespoke installation permit

Permit number: EPR/NP3099FS

Document number 6: Table 1b Types of waste accepted

Waste code	Description of waste
13 08 99*	Oil wastes not otherwise specified

The oils which would be accepted on site are lubricating oils from refrigeration compressors and they could be synthetic, semi-synthetic or mineral. Oils are selected for their technical properties based on the type of refrigerant gas in the compressor. As no other code in chapter 13 specifically relates to refrigerant oils, the 99 code is deemed the most appropriate.
