Subject: Annual 2017 Reporting for Lamby Way EPR/AB3096CP – Energy1, WaterUsage1 & Performance1 forms & Annual 2017 PC 4.2.2 (a) report

Hello Liz,

Please find attached the annual reporting forms for the Lamby Way OWC.

(See attached file: Lamby Way annual Reports.pdf)

4.2.2(a) The annual reports show a successful first year of operations for the OWC plant. The OWC has received green waste from Cardiff and Vale councils since April. With training and site procedures, the contents and contamination of the waste received by the collection vehicles has improved massively as the year has progressed.

Water usage data is unavailable due to metering issues on the site, with the supply coming unmetered from the Cardiff City Council Lamby Way Tip. I have requested that action should be taken on this with a meter install on the site to monitor future water usage.

Pas 100 was achieved in October of 2017 to allow the site to start sending out compost as a product. There is currently 8000 Ton of waste in windrows at the site that will slightly reduce in early 2018 as more product reaches the required specification.

Best Regards
