Dear David

Please find attached: **IQE Silicon Compounds Monitoring Returns Forms,** releases to air sampling was carried out by ESP Environmental using MCERT's methods where possible.

A1 – HCl Releases to Air
Find enclosed

A2 – Releases to Air
Find enclosed

H1 Model – Releases to Air
Find enclosed, as per the permit variation this will prove no environmental impact from our emissions to air.

E2 – Environmental Releases from Energy Usage
Find enclosed

S1 – Releases to Sewers
Find enclosed

Fugitive Emissions 2014
There is one fugitive emission to report, whilst servicing the Chiller system 37.6kg of R407C refrigerant had to be added to the system, as such it is deduced that this quantity had been emitted from the system. A small leak was found and repaired at the time.

If you require any further information or clarification then please contact me.

Regards

Paul Carroll
Manufacturing Manager
