Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Permit conditions and compliance summary	CCS Category	Condition(s) breached
KEY: See Section 5 for breach categories, suspended scores will be indicated as such. A = Assessed or assessed in part (no evidence of non-compliance), X = Action only, O = Ongoing non-compliance, not scored.		

Number of breaches recorded	0	Total compliance score (see section 5 for scoring scheme)	0
------------------------------------	----------	---	----------

If the Number of breaches recorded is greater than zero, please see Section 3 for our proposed enforcement response

Annual Reporting Forms

Permit Condition 4.1.4 Fugitive Emissions Review

The on-going controls on fugitive emissions appear adequate and these should continue to be applied.

Permit Condition 4.1.5 EMS review of targets

The reported year on year reduction in electricity is commendable. Although it is disappointing that the targets for gas, oil, general waste and water were not met. Celsa should continue to set realistic targets that promote continued reductions. Celsa should also consider including a target for hazardous waste and target year on year reductions.

Permit Condition 2.7.2

The reported annual energy management system update meets the permit requirements. Replacement of the recuperator at the end of the year will hopefully be reflected in further energy efficiency improvements during 2018.

Reporting Forms A2, EW1, R1, PI1

All necessary information has been provided. Celsa should consider reviewing the methodology used to determine the annual mass releases for NO_x, SO₂, CO and particulates. As quarterly monitoring data for these species is measured, rather than using the average of the four measurements during the year in combination with the total operational hours to calculate the annual mass release, instead the annual mass releases could be determined with greater accuracy if the quarterly monitoring result is used with the quarterly operational hours. **Action : Celsa.**

Section 3 – Enforcement Response

You must take immediate action to rectify any non-compliance and prevent repetition.

Non-compliance with your permit conditions constitutes an offence and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.

Section 4 – Action(s)

This section summarises the actions identified during the assessment along with the timescales for when they will need to be completed.

Criteria Ref.	CCS Category	Action required/advised	Due Date
See Section 1 above			

Section 5 – Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- Advise on corrective actions verbally or in writing
- Require you to take specific actions verbally or in writing
- Issue a notice
- Require you to review your procedures or management system
- Change some of the conditions of your permit
- Decide to undertake a full review of your permit

Any breach of a permit condition is an offence and we may take legal action against you

- We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.
- Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and/or suspension or revocation of the permit.

See our Enforcement and Civil Sanctions guidance for further information

This report does not relieve the site operator of the responsibility to

- Ensure you comply with the conditions of the permit at all times and prevent pollution of the environment
- Ensure you comply with other legislative provisions which may apply

Non-compliance scores and categories
