**Applicant: Radnor Hills Mineral Water Company Ltd**  
**Facility: Radnor Hills, Heartsease, Knighton, Powys, LD7 1LU**

Dear Mr White,

**Addendum to letter submitted on 31<sup>st</sup> March 2017 on behalf of Radnor Hills Mineral Water Company Ltd.**

We provided a response to your Schedule 5 (dated 31<sup>st</sup> January 2017) on 31<sup>st</sup> March 2017. However, we noted that the Ground Investigation report prepared by Geotechnical Engineering Ltd had not been provided for us to supply to you. This has now been finalised, and provides details on the quality of soils beneath the operational areas within the permit boundary.

In addition to the ground investigation report, we note that extensive borehole water quality analysis has been conducted at the Radnor Hills site, including by the Environment Agency. A summary of some of the water quality parameters was provided in the Rukhydro November 2015 report *Evaluation of Risks to the Water Environment*.

Radnor Hills own data includes dated analytical certificates and we propose that, together with data held on NRW databases, this is used as a baseline for groundwater quality. This can be provided to NRW if desired.

We trust that this appropriately responds to your queries on this point and provides clarification. Please let us know if you have any further queries.

Yours sincerely,

*Via email*

John Henry Looney
