Introductory note

This introductory note does not form a part of the permit

The following notice, which is issued pursuant to regulation 20 and Part 1 of Schedule 5 of the Environmental Permitting (England and Wales) Regulations S.I.2007 No. 3538 (the Regulations), gives notice of the variation of an environmental permit to operate a regulated facility. Schedule 1 of this notice lists any deleted conditions, schedule 2 lists any amended conditions and Schedule 3 lists any conditions that have been added.

This simple standard variation permits the daily effluent flow rate to water to increase from 99m³ per day to 300m³ per day. This is needed in order to facilitate an increase in the number of lambs slaughtered. The environmental impact of this increase in volume of effluent discharge into the River Severn has been assessed and is considered to be insignificant.

The status log below sets out the permitting history, including any changes to the permit reference number.
