How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

Criteria	Action needed	Complete by
C4	Remove the remaining deposit of waste wood chip to an authorised facility in order to return to compliance with the sites fire prevention plan within 90 working days and notify Natural Resources Wales on removal of the waste, providing the waste transfer notes.	08/04/2022

Action criteria codes are listed in the 'Important information' section below.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

You are non-compliant with your permit.

We are currently considering taking enforcement action against you for the non-compliance recorded above. We will contact you in due course.

4. Details of our assessment

I, Officer Elysia Lovelock attended the regulated facility of Woodmat Ltd, Company Number 08639652, 32 Chilcott Avenue, Brynmenyn Industrial Estate, Bridgend, CF32 9RQ at 12.45pm on Wednesday 17th November 2021. The Operator holds a Standard Rules permit SR2011 No4 for the treatment of waste wood for recovery.

The purpose of the visit was to assess the sites compliance in respect of the environmental permit EPR/YB3097TR held by Woodmat Ltd, in relation to the action stipulated in previous Compliance Assessment Reports, CAR references NRW0036737 and NRW0036994 available on the Public Register.

As the site is non-operational, it was not possible to gain access to the site, however, it was possible to determine that the site remained non-compliant with the permit, as I observed from the gate that the deposited woodchip stored at the site remains in situ, in breach of the sites fire plan, as can be seen from the photographs taken below.

FIRE

Natural Resources Wales considers that the following condition of the environmental permit is being contravened:

Permit condition 3.4.1 states “The operator shall manage and operate the activities in accordance with a written fire prevention plan using the current, relevant fire prevention plan.” Or 2.3.1?

This has therefore been scored as a (C3) non-compliance which could have a minor environmental effect under (C4) C4 General Management – Storage, handling labelling and Segregation.

BECAUSE

I observed that the deposit of woodchip remained in situ. The sites fire prevention plan states: “no material should remain on site for longer than 3 months. This will be achieved by operating a first in first out policy and potentially using two designated areas for storage, both within the shed area.” Therefore, the site has not managed or operated the activities, in accordance with the fire prevention plan.

ACTION NEEDED: Please refer to ‘*Section 2. What action is required?*’

Please be aware there is outstanding enforcement action required in respect of the recorded non-compliances and offences committed by the Operator during the lifetime of the permit.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

What are suspended scores?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
