Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation and consolidation adds hydrated lime dosing to the current abatement systems on-site to reduce aerial emissions. In addition, particulate monitoring on emission point Y has been changed to annual monitoring

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
