A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

The operator is only required to carry out limited monitoring of emissions to sewer including flow. The resultant score is 95.5% and no serious issues or non compliances identified.

This is in part due to the operators personnel organisational set up; qualified personnel; following the MCerts scheme; thorough policies and work instructions, with good document control.
