Subject: Monitoring

Hi Huw

I have no problem with you moving the parallel monitoring by a few weeks.

Have a Happy Christmas / New Year.

Regards

Toby

Subject: RE: Improvement Conditions

Hi Toby,

Thanks for the CAR summarizing the status of the IC's from our Permit. This is most helpful. It is good to have an at-a-glance confirmation of their status.

I've been speaking to Ian about our monitoring programme for 2015. The next anniversary of parallel sampling is 9th and 10th of June. Our site owners require us to carry out a major maintenance outage on Unit 20 starting on 15th May and on Unit 10 in August. This will be an 'Extended Hot Gas Path Outage' for both units, lasting approximately 5 weeks. This means that unit 20 will be coming to the end of its outage in mid June. Would it be acceptable to postpone the parallel sampling to the second half of June, so that we are clear of the Unit 20 outage?

No hurry for an answer. If I don't speak to you before the holidays, have a very Merry Christmas and a Happy New Year

Huw
