Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

E1 - Emissions - Air	A	
E3 - Emissions - Surface water	A	
G1 - Monitoring and Records, Maintenance and Reporting - Monitoring of emissions and environment	A

Annual Reporting Forms for 2015

The following reports were received on 20th January 2016, for the period January to December 2015.

- Air 1
- Air 2 (including comments on outages and CEMS problem)
- Air 3 (for release point A1 and A2, the invalidation log)
- **Air 5 - Errors found**.
- Air 6
- Energy 1
- Water 1

The majority of the results were compliant with permit conditions. However, for A5 (for emission point A2) has an error in the dust and oxides of nitrogen columns. The starting figure of 20.076 tonnes for dust does not match the actual of 0.469 tonnes.

The starting figure for oxides of nitrogen of 20.076 tonnes does not match the actual of 0.163 (which also happens to match the figure for the sulphur dioxide column). Presumably there has been a typographical error. Please see attached "form jpg."

Please can you correct the information and submit an amended form.
