### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

Variation EPR/XP3136MT/V003 combines the existing permit and its previous variations into a consolidated permit compliant with the requirements of the Industrial Emissions Directive (IED).

In addition, two 198kWth biomass boilers have been introduced into the permit to provide hot water to heat the poultry houses and the current LPG heating will remain in case of breakdown. Fuel types for the biomass boilers have been specified in Schedule 2 of the permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
