Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

Variation EPR/BP3739UZ/V003 combines the existing permit and its previous variations into a consolidated permit compliant with the requirements of the Industrial Emissions Directive (IED).

In addition, three 221.1kWth biomass boilers have been introduced into the permit to provide hot water to heat the poultry houses and the current Kerosene heating will remain in case of breakdown. Fuel types for the biomass boilers have been specified in Schedule 2 of the permit. Also the installation boundary has been extended to allow for the re-siting of one barn, without increasing the number of bird places permitted. In addition, heat exchangers have been added to the permit.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number. .
