### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation allows for an extension to the permit boundary, allowing the operator to expand their business. The paint shop and NDT sections will be expanded, upgraded and relocated to the new extension which will also allow extra space for office and canteen facilities. The variation also updates the permit conditions to that of the current modern permit format. Emission point A3 and associated monitoring is removed from the permit to reflect its removal on site. Emission points A7 and A8 are added as a result of the expansion and an improvement condition is included requiring the operator to monitor emissions from these new point source emissions to confirm they screen out in the H1 risk assessment screening tool as insignificant.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
