Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

Cefn Mawr Poultry is switching from a fossil fuel (gas) dependant heating system to biomass boilers to heat the existing poultry houses.

Two biomass boilers with an aggregated thermal input of 396 kW_{th} will be housed in separate purpose built self contained boiler rooms. The fuel used will be virgin wood chip or biomass wood pellets delivered to site and stored in the fuel stores attached to each boiler. On site storage is approximately 20t and the total annual throughput of the installation is estimated at 300t.

The solid fuel is delivered by 'Blower' Lorry and unloaded directly into the stores. From here they are fed into the boiler by a fully automated auger system.

A consolidated permit has been applied for and as a result we have issued a new modern permit which consolidates EPR/XP3036MG/A001, EPR/XP3036MG/V002, EPR/JP3734VC/T001 into EPR/JP3734VC/V002 as referenced in Schedule 2 of this variation notice.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
