This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

The 2018 annual review of fugitive emissions was received on 27th April 2018.

It is a comprehensive review of all the possible sources of fugitive emissions from the installation and of the measures in place to prevent or control them. The risk will be reduced further if the chemical storage is moved into the building, even though it poses no significant risk at the moment. All measures in place are adequate.

The report is accepted.
