Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

The operator has obtained operational data for the facility, including data on the composition of the waste being received and the availability of the facility.

Taking this into consideration, the operator has applied for a variation to the following aspects within the permit:

- (1) Increase the overall permitted plant throughput from 350,000 tonnes to 425,000 tonnes per annum;
- (2) Update the emission limit for carbon monoxide to a 10-minute average as per Annex VI, Part 3, paragraph 1.5 of the Industrial Emissions Directive (IED);
- (3) Removal of on-site metals recovery from bottom ash;
- (4) Update Tables S1.2 and S1.3 to reflect that a number of the Improvement and Pre-operational Conditions have been discharged;
- (5) Amend the source of boiler feedwater from collected rainwater to mains water;
- (6) Amend the drainage arrangements for the isolation of surface water discharges in the event of a spill;
- (7) Amend the drainage arrangements to confirm that there will be 15m³/hour of effluent discharged from the installation;
- (8) Amend the emission points plan to amend the location of emission point W1 in accordance with the as built design;
- (9) Add a number of additional EWC codes to the list of waste to be processed;
and
- (10) Update the operating techniques to allow for the handling of large bulky items which are shredded.

The permit has been varied and consolidated to update the changes.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
