Introductory note

This introductory note does not form a part of the notice.

The following gives notice of the variation and consolidation of an environmental permit.

This variation incorporates the changes required by the Industrial Emissions Directive following a statutory review of permits in the production of non-ferrous metals sector. This includes the amendment of the wording of several permit conditions relating to notifications and also includes the addition of a condition relating to a requirement for monitoring of groundwater, soil and relevant hazardous substances required by IED. Consideration for the Water Framework Directive is also included. The Energy Efficiency Directive was also considered as part of the Regulation 60 response. At the same time the permit has been converted into the current EPR Permit format.

The Industrial Emissions Directive (IED) came into force on 7 January 2014 with the requirement to implement all relevant Best Available Techniques (BAT) conclusions as described in the Commission Implementing Decision. The BAT conclusions for the non-ferrous metals industries were published on 30th June 2016 in the Official Journal of the European Union (L174) following a European Union wide review of BAT, implementing decision 2016/1032/EU of 13th June 2016. We are satisfied that the operator will be compliant with the published BAT conclusions which will apply from 30th June 2020.

A normal variation has also been completed at the same time to vary the site permit. A number of process changes have been made on site. Due to this a number of emission limit values have been changed, some have increased and some have decreased, this has resulted in a net reduction of Lead emissions to air of 5% from site.

The schedules specify the changes made to the permit. Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the changes being made.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
