

Schedule 1 – 5.1.1 Notification

PART A

Permit Number:	BR9715B
Name of Operator:	Solutia UK Ltd
Location of Installation:	Corporation Road, Newport, Gwent, NP194XF
Location of the emission:	From the 'Dequest 2010' process
Time and date of the emission:	23/02/2016 at approximately 07:20

Substance(s) emitted	Media eg air /water	Best estimate of the quantity or the rate of emission	Time during which the emission took place
Dequest process batch containing: Hydrochloric acid, Phosphorous acid, Acetics, and water	N/A	N/A - This Notification relates to a plant equipment item failure, rather than any appreciable uncontrolled release to environmental media	Approximately 10 minutes following identification of the leak

Measures taken, or intended to be taken, to stop the emission:	Following identification of a leak on a bellows unit located on the Dequest 2010 process – the circulation pump was stopped, and the reactor isolated thereby preventing any further discharge. As a precautionary measure, 'monitor' water sprays were employed in case of potential vapour generation whilst draining the pipework to effect the repair. The deluge systems (used as an abatement technique in the event of any appreciable release) were not required in this instance. Further information to follow in the Part B
