DEAR MR HOSG.

I am writing to you about the application number: PAN-000869 for a permit to run this plant. I feel that all our concerns about this project are being ignored. It is too close to local housing as we are in a high position above the site and feel that the emissions will affect our health.

Another big worry is the prospect of the stock of woodchip etc will catch fire, as some sites have done in Wales. It is situated next to a large long park and a fire would be catastrophic, as the toxic emissions would prevent people from leaving their homes for who knows how long.

I think a site visit is very important for you to get it all in perspective.

It also mentions surface water discharge point is that going into the dock water. If so, you should take notice that a canoe club uses the dock every week and if the water becomes contaminated what will happen to them if they capsized and swallow the water.

I hope you will study the effects that this grant of a license for this plant and.

REFUSE IT

Carole Webster
