Yours sincerely

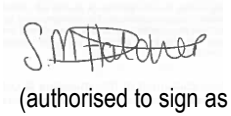

Sioned Hatcher
Environment Advisor

Enc

Form Number: A1

Permit Reference Number: EPR/BV0759IC
Operator: CELSA Manufacturing (UK) Ltd
Installation: Cardiff Rod and Bar Mill

Reporting of Emissions to Air for the period from …01 April – 30 June 2017							
Emission Point	**Substance / Parameter**	**Emission Limit Value**	**Result [1]**	**Test Method [2]**	**Sample Date and Times [3]**	**Accreditation/ Certification [4]**	**Uncertainty[5]**
A1	**Oxides of Nitrogen (NO_x)**	**400mg/Nm-3**	**192.1 mg/m3**	**BS EN 14792: 2005**	**07/07/17, 10:55 – 14:55 [6]**	**MCERTS**	**+/- 9.5**

Signed:  Date…19 July 2017

(authorised to sign as representative of the Operator)

Notes:

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.

[2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.

[3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.

[4] The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

[5] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.

[6] The external contractor intended to take the samples on the 16th of June, however, there was an unexpected PPM day. The earliest they could return to site was the 7th of July.
