A25	Lead and its compounds	0.5 mg/m <sup>3</sup>	<b>Not Operating</b>				
A26	Lead and its compounds	0.5 mg/m <sup>3</sup>	0.13mg/m <sup>3</sup>	BS:EN:14385:2004	18/07/16 14:40 - 15:28	UKAS & mCerts 2	±0.03mg/m <sup>3</sup>

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, corrected to reference conditions. Where the emission is expressed as a range, the result is given as the 'minimum – maximum' measured values.

[2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.

[3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.

[4] The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

[5] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated. The following uncertainties are quoted on a different basis (basis as stated)

Signed  Date 6/10/16

\* Six Monthly Report for period 1<sup>st</sup> April to 30<sup>th</sup> September 2016

Form Number : S1 Reporting of Emissions to Sewer for the period from ...1<sup>st</sup> July 2016....to....30<sup>th</sup> September 2016.....**Emissions to Sewer**

Emission Point	Substance / Parameter	Emission Limit Value	Result [1]	Average Result [6]	Test Method [2]	Sample Date and Times [3]	Accreditation/ Certification [4]	Uncertainty [5]
S2	Chemical Demand	None	61mg/l *	n/a	Full method statement on file (ALS Environmental)	20/7/16	UKAS	
S2	Sulphate	None	174mg/l *	n/a	(ALS Environmental)	20/7/16	UKAS	
S2	Total suspended solids	None	19mg/l *	n/a	(ALS Environmental)	20/7/16	UKAS	

\* Six Monthly Report for period 1<sup>st</sup> April to 30<sup>th</sup> September 2016

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values.

[2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. colorimetry.

[3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements, or flow/time proportional samples, the percentage of the process operating time covered by the monitoring is given.

[4] The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

[5] The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated. The following uncertainties are quoted on a different basis (basis as stated) – {The basis of any other uncertainty figure needs to be stated. Where no figure is available the Agency will need to agree an appropriate uncertainty value.}

[6] The result given is the average value of all results obtained during the reporting period.
