Dear Ms Sellers,

With Reference To:

**GS Yuasa Battery Manufacturing UK Limited
EPR/BV5386IX**

Please find enclosed a Minor Technical Permit Variation for the above site.

Following discussions with Dave Griffiths, the site regulating officer, it was agreed that this Minor Technical Variation could be submitted and assessed as part of the current permit variation following a BAT Conclusions review instigated by Natural Resources Wales. The cost for this variation is to be charged at an hourly rate of £125 (for up to 15 hours) and invoiced upon completion.

I have been advised to submit directly to yourself but please let me know if this also needs to be submitted to the permitting team. Please could you forward me your address for sending a paper copy of the application and also advise if you require a CD copy.

Please let me know if you have any queries.

Yours sincerely,

Tim Colebrook.
Environmental Consultant.
Environmental Visage Limited.
